LEHIGH *Alumni* BULLETIN

Let 'er go! it's STEEL!—and in a hurry!

Another trainload of Republic steel.

To be used for ships, planes, guns, tanks, trucks, shells.

Thousands of tons are going out of Republic's 44 steel-making and fabricating plants every day—by rail and highway.

This is the answer of Republic men to the threat of Axis aggressors.

It is an answer to America's demand for production—*uninterrupted* production.

It is an answer to thousands of pilots who need planes—to soldiers who need fighting equipment—and lots of it—to sailors who need ships of all types.

Republic "aircraft quality" steels, special alloy steels, carbon steels, sheets, plates, bars, nuts, bolts—all of Republic's thousands of

products—are vital to the Victory program of America and its allies.

This country must out-produce Germany—Italy—Japan. And will do it! Civilian needs must wait.

All of us must go without new cars, new washing machines, new stoves, new refrigerators, building materials and many other things made of steel.

Every ounce of production-energy must now go toward *winning the war*.

Factories turning out thousands of finished war implements need steel. Need it now. Must have it. And are getting it.

Republic is doing its full share of the job—in a hurry. Republic men believe that "Production for Victory" is *more than a slogan*.

ANOTHER SUCCESSFUL ALUMNI WEEK-END WAS BEGUN WHEN MORE THAN 200 ATTENDED THE DINNER

VICTORY AND LEHIGH THEME STRESSED AT 1942 REUNION

IN these days of war, Lehigh men, most of whom are working night and day in vital war industries, were hardly expected to return in great numbers for the annual alumni reunion held June 5 and 6. But this year as in the past, alumni able to leave their work displayed true Lehigh loyalty by returning to old South Mountain for two days of relaxation with fellow classmates and friends.

True, attendance was less than in past years—particularly among the younger classes, many of whose members are on active duty with the armed forces. But despite this decrease, enthusiasm ran high among those alumni who did return.

Indication that this would be another successful reunion was evident early Friday evening when more than 225 enthused alumni filled the ballroom of the Hotel Bethlehem to hear such prominent speakers as Walter S. Landis, '02, Vice-President of the American Cyanamid Company; Alfred R. Glancy, '03, Chief of Production under Commanding General Sommervell, Services of Supply; and Colonel Fay W. Brabson, head of Lehigh's department of Military

Science. Surprise feature of the Alumni dinner was a personal talk given by Donald Nelson, head of the War Production Board, who spoke from Washington over a specially leased wire.

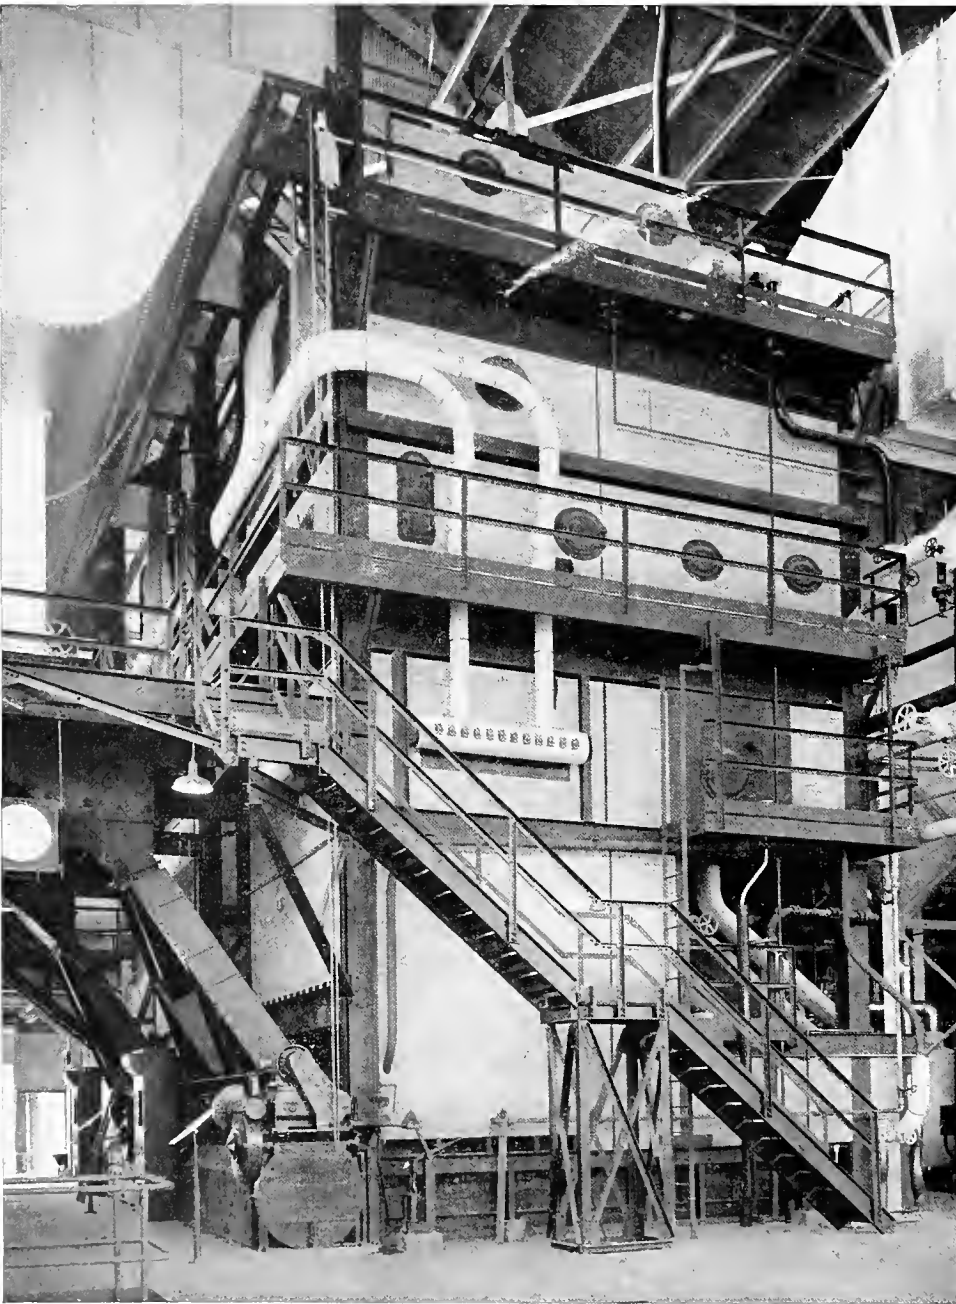

After the dinner alumni transferred their interest to the Bethlehem Club where the annual "Welcome Back" smoker was sponsored by the Lehigh Home Club. It was in this atmosphere of hospitality that Lehigh men from all over the country had an opportunity to renew friendships and to learn the latest news about University activities.

Saturday morning, alumni visited the various undergraduate classes which are now in session under the accelerated program and then attended the annual Alumni Association meeting where they heard President Williams report on the state of the University and the administrative measures that have been taken during the war emergency.

At noon, alumni, their families and friends were guests of the University at a luncheon served in Lamberton Hall and at the conclusion of this repast the various reunion classes headed by the 50-year anniversary class of 1892 formed for the traditional and colorful parade about the campus. This ended at the flagpole where alumni united in singing the Alma Mater and then broke ranks and dispersed to their various class banquets, which lasted until late Saturday evening.

LANDIS PRAISES INDUSTRY

GLANCY URGES PRODUCTION

BRABSON REPRESENTS ARMY

GOVERNMENT, INDUSTRY, AND THE ARMED SERVICES KEYNOTE THE 1942 BANQUET

THE flag bedecked ballroom of the Hotel Bethlehem, with tables symbolically arranged in a "V" formation provided a setting for the annual alumni banquet, the theme of which was "Lehigh and Victory". All the more impressive was the opening ceremony when the lights dimmed and the alumni sang the National Anthem while the Stars and Stripes fluttered proudly from a palm covered stand in the middle of the room.

Honored guests, members of the Class of 1892 celebrating their fiftieth year reunion and members of the fifty-year plus club shared the position of honor, while directly behind them sat University dignitaries and speakers.

Surprise of the evening came at 9:00 p.m. when Eugene G. Grace, chairman of the Board of Trustees, rose and introduced this country's "busiest man," Donald Nelson, chief of the War Production Board, who spoke to the assembled Alumni over a leased wire direct from his office in Washington. As the nation's production head started his talk the lights were again dimmed and a large picture of Mr. Nelson was flashed on the screen.

Chiefly concerned with industry and

the current production problems, the alumni were gratified when Mr. Nelson thanked industry for the tremendous job it is doing and said: "The only way to win the war is to be smarter than Germany in production. We are now hitting the high production figures set by the President several months ago, but the war won't be won by this attainment. The need is much greater for now we must supply fighting forces all over the world."

In reply to Mr. Nelson's message, Dr. Grace promised that he would have whole hearted response from the men of Lehigh.

Coinciding with the theme of the banquet, each of the three principal speakers represented a vital part of our national effort for ultimate victory. Representing industry, Dr. Walter S. Landis, '02, a University trustee now actively engaged in coordinating the chemical industry with the war program, spoke on the problems of industry and told how it is revising its methods of production in order to co-operate fully with the national program.

DR. Landis in his talk declared: "I do not need to tell you men what

industry has accomplished. If you will take a trip to the West coast and notice the mountains of supplies waiting on the sidings and piled up in the great arsenals around the ports; or it might be a trip to the East where you can see great stores of materials that have been unloaded from cars to free the rolling-stock, and piled up awaiting transport.

"Industry is producing at a rate undreamed of and if we are late it is only because we were not called upon soon enough to plan quantities and schedules. Either our government's agencies were incompetent to determine requirements because they lacked the benefit of an adequate military intelligence service, or they were unable to comprehend the alien forces that were in full operation in many parts of the world.

"Industry has more than fulfilled its tasks yet is now being made the whipping boy for the shortcomings of the planners. You representing industry appreciate very well the difficulties we met, yet in spite of all this we have trained and built and operated until we are clogging the transport system with our products. That the transport is inadequate is not the fault of industry but a child of the planning. You who have built industrial plants know that your first problem is to provide adequate access and egress even before construction begins. Certainly the least expected of Washington was appreciation of the fact that the munitions were not going to be consumed in quantity in the Middle West.

"Now that industry is supplying

WALTER R. OKESON PRESENTS GEORGE HOBAN, THE NEW GRID COACH

FOLLOWING THE BANQUET ALUMNI

equipment faster than it can be moved and employed, we should begin to think of the postwar economic problems. Such forward thought has been frowned upon by high administrative officials, but they have been wrong in their planning, they have been lax in their execution, and they may be equally at fault in criticizing us for thinking of our future.

"After all, Lehigh is a symbol of in-

dustrial success. Every dollar that has been expended in building up that structure on the Hill has come from industry, beginning with the foundation of Asa Packer. The University is going to need money for its maintenance and survival over the next future and those dollars will have been industrial dollars somewhere in their history. It, therefore, behooves all of us to spend

a great deal more of our time beginning right now in planning for their creation and for their preservation so that Lehigh can draw its just share. If we do not solve this problem the name "Lehigh" will disappear and in its place will be that of some political leader that without such monument would have passed quickly into oblivion. Such things must not happen."

DR. GRACE PROMISES THE WHOLE HEARTED RESPONSE OF ALUMNI

ENJOY THE HOME CLUB'S SMOKER

DR. EUGENE G. GRACE INTRODUCES THIS COUNTRY'S "BUSIEST MAN"

HHEAD of Lehigh's department of Military Science, Colonel Fay W. Brabson, a graduate of the University of Tennessee, spoke about the Lehigh men who hold top ranking commissions in the armed forces, and said "All Alumni and friends of Lehigh may take a just pride in the fact that our University is contributing to this trained military leadership as well as to research and production."

Third speaker, Alfred R. Glancy, '03, Chief of Production under Commanding General Sommervell, Services of Supply, centered his address about the current production of armament in this country, and emphasized the fact that this work must be continued as this country is now the arsenal of the world.

In his address Mr. Glancy declared, "The organization of the ordnance

group has grown from a 10 million dollar business to one of twenty-five billion, and it has not stopped growing." The speaker then told about his recent air trip to England where he served as advisor to Ambassador Harriman, and concluded by saying "While this may not be your administration, it is your country, so refrain from criticism."

ARTZOG WAS THE TOASTMASTER

PRESIDENT WILLIAMS EXTENDED OFFICIAL GREETINGS TO ALUMNI

RETURNING GRADS REGISTERED IN THE MEMORIAL BUILDING

CONCERNED with the welfare of their Alma Mater, loyal Lehigh alumni paid serious attention to the results of two important business sessions held during Alumni week-end.

First, the annual meeting of the Board of Directors held Friday noon revealed that the University, now operating under the Accelerated Program, is more than holding its own in these troubled times, but alumni were warned that the whole hearted cooperation of all will be needed if Lehigh and other privately endowed colleges are to survive the war and the reorganization

period that is to follow.

Directors were not dismayed when the report of the Alumni Fund committee disclosed the fact that the University Fund, most vital of all gifts to Lehigh, had fallen short of the estimated \$50,000 goal. They knew that prior to Pearl Harbor, the contributions from interested alumni had been running more than \$13,000 ahead of the 1940-41 campaign, but that increased taxes prevented many alumni from contributing their usual gift to Lehigh.

Enthusied rather than discouraged,

INTERESTED ALUMNI HEAR DR. WILLIAM

TWO BUSINESS SESSIONS PLANNING FOR THE FUTURE

C. I. T. Edwards, '13, president of the Council of Class Agents, the organization responsible for the fund, predicted that in normal times Lehigh should be able to obtain \$150,000 a year from her alumni. He admitted that it will take time to reach that objective, but he was emphatic that it can be done.

A proposal that efforts be made to form a closer liaison between undergraduates and alumni was also made by Mr. Edwards who presented eleven suggestions which if carried out will make better alumni of Lehigh students.

Encouraging was the report of the Student Placement committee, headed by E. Robins Morgan, '03, who stated that 99.5% of the graduating seniors who majored in engineering have been placed in industrial and government positions. A total of 56% of the Arts students and 54% of the business graduates have also been placed with excellent prospects of an additional group being placed this month.

HARTZOG PRESENTS ACTIVE MEMBERSHIP CUP TO CLASS OF '95

HEAR ABOUT THE ACCELERATED PROGRAM

DEVOTED MUCH TIME TO RE OF THE UNIVERSITY

IT was with interest that officials of the Association heard S. T. Harleman, '01, chairman of the Prospective Students committee, report that the number of applicants for admission to Lehigh next September is approximately the same as the number of applicants at the same time last year. However, the enrollment in the College of Arts and Science and that of Business Administration seems likely to be reduced about 30%; while there is a possibility of admitting a larger number of students to the College of Engineering.

The problem of Alumni Student Grants again occupied much of the Directors' attention, and after N. E. Funk, '05, chairman of the Student Grant committee, and C. F. Lincoln, '11, chairman of the Grants Collection committee, had presented their reports, President Herbert J. Hartzog, '04, read a letter written by President Williams in which he fully explained the Administration's viewpoint of the Alumni Student Grant Plan. (This letter is

ALUMNI AND THEIR FAMILIES ENJOY THE SATURDAY LUNCHEON

published in full under the official minutes of the meeting.)

In describing the accelerated program under which Lehigh is now in operation for twelve months out of the year, President Williams, who addressed the general meeting of the Association Saturday morning, presented three administrative objectives of prime importance. They are: (1) to serve the national needs; (2) to preserve the careers and futures of the young men who have presented themselves to the counsels of the faculty by choosing Lehigh as their Alma Mater; and (3)

to conserve the educational vigour and integrity of Lehigh University. (Dr. Williams' full report can be found in detail under the official minutes.)

Other features of Saturday's meeting included a report by Walter R. Okeson, '95, treasurer of the University, and the announcement of the elected officers of the Association for 1942-43; James H. Pierce, '10, president; Donald R. Lowry, '11, and Mercer B. Tate, Jr., '20, vice-presidents; Robert S. Taylor, Sr., '95, treasurer; Stewart J. Cort, '06, alumnus trustee, and Howard J. Eckfeldt, '95, archivist.

BOARD MEMBERS HEARD ANNUAL COMMITTEE REPORTS FRIDAY

WALTER OKESON EXPLAINS LEHIGH FINANCES TO ALUMNI AT BUSINESS MEETING SATURDAY

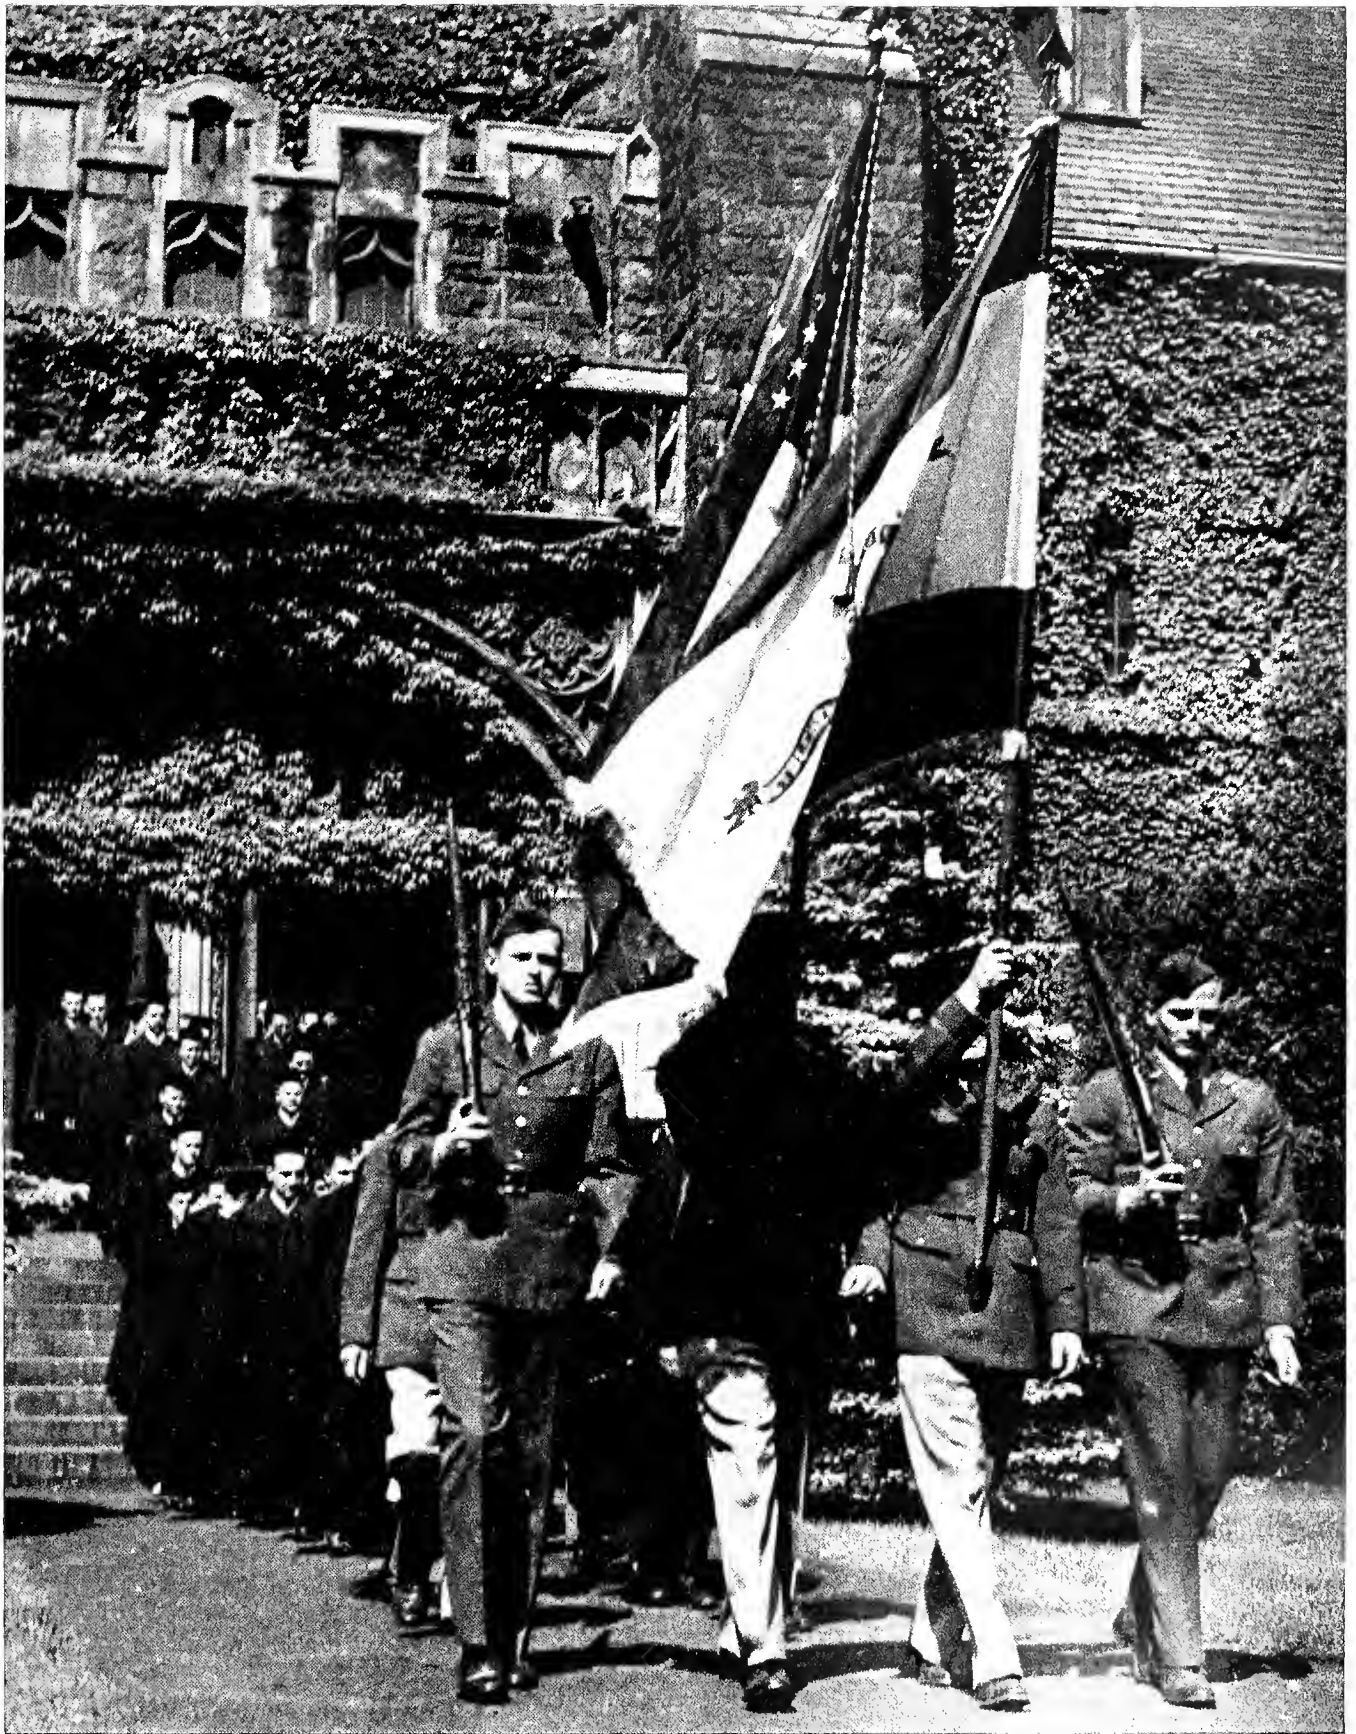

THE PRESIDENT CHATS WITH AN OLDER GRAD AT THE END OF THE ALUMNI REUNION PARADE

The Board of Directors at their annual meeting listened with interest while committee chairmen presented reports on the current status of the University under the new accelerated

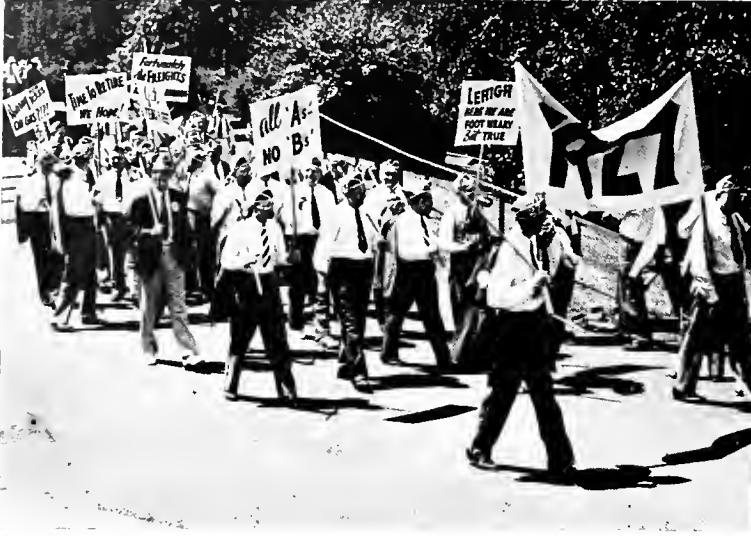

program and explained the measures that must be taken if Lehigh and the present undergraduates are to emerge unscathed from the war and the period that is to follow.

The color guard played an important part during the commencement week-end. Particularly impressive was the Academic procession when seniors and faculty members formed at the Alumni Memorial building and paced by the uniformed guard of honor, proudly bearing the national and

university colors, proceeded slowly down the campus to the Packer Memorial Chapel where the Baccalaureate services were held. The following morning the procession formed again and marched across the campus to the new Eugene G. Grace Hall where the commencement exercises took place.

The War Could Not Dampen the Enthusiasm

OVERSEAS HATS, HOBO KITS, AND CANES FOR '27

THE PARADE WAS ENJOYED BY THE SPECTATORS

TRUE to tradition, Lehigh alumni who participated in the annual reunion parade displayed the same enthusiasm and spirit of fun that has prevailed on this occasion for years. Of course, the ranks of the younger reunion classes were thin because many of their number are now in the armed services or are engaged in vital war work, but those who did parade gave a good account of themselves.

Led by the University band and paced by the veterans of 1892, celebrating their fiftieth reunion, the classes formed on the Packer Hall drive and marched down the campus to the flagpole where the program ended with the singing of the Alma Mater. Assisting the University band were three other musical organizations whose music added materially to the success of the march.

Awarded the Dave Petty Parade flag, for originality of theme, members in line, and colorful costumes, the class of 1922, celebrating its twentieth reunion, wore white monogrammed sweaters, blue crew hats with class numerals, and were preceded by a well drilled band. Back for their fiftieth, members of the class of 1927 combined the war

theme with that of the current gasoline rationing problem, and wore overseas caps, and carried canes from which were suspended typical hobo kits. Signs such as "All 'A's' No B's" and "Lehigh—Here we are, footweary but true" were also carried by this class.

Most humorous were the members of the class of 1932 who attempted to parade wearing roller skates, shorts, and pith helmets. All went well until the line of march swung down hill, and then '32ers, pith helmets and all, went flying in all directions.

The class of 1941, most of whose members are in the army, was represented by a handful of enthusiastic reunioners who carried signs which told the story that "A good gang was in the Army." Many of the older classes scorned elaborate costumes and were content to wear badges, caps or hatbands.

And finally, when the last notes of the ever inspiring Alma Mater faded into the distance, and the alumni dispersed for individual class reunions, it was generally agreed that another of Lehigh's famous reunions had reached a successful climax.

1922 WON THE PETTY FLAG AS THE BEST IN LINE

THE REUNIONERS FROM '12 SCORNED UNIFORMS

THE PROCESSION ENTERS THE MEMORIAL DRIVE

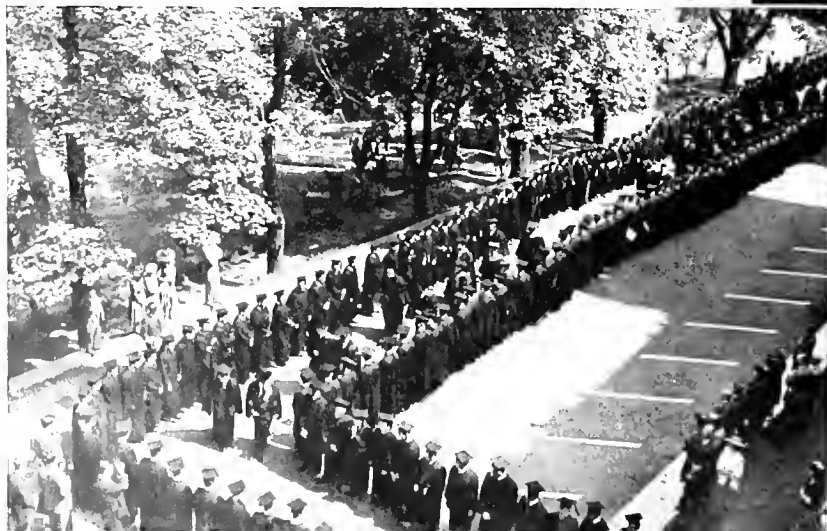

IN THIS world of strife and turmoil where nations are embattled against nations, it was only natural that graduation speakers should stress the need for trained and far-sighted men as they addressed the 335 Seniors who comprised Lehigh's first class to graduate under the accelerated program.

Not even the war and gas rationing prevented parents and friends of graduating seniors from coming to Packer Chapel, Sunday, May 17 to hear the Baccalaureate sermon preached by Bishop Frank W. Sterrett, a University trustee, who declared, "God has not let us down. The future will not be easy for most of us, especially for you young men. We must build saner and better. The development of our own individuality is necessary and there must be a willingness not to be afraid of our own responsibility, and a willingness to cooperate in a way unknown to us."

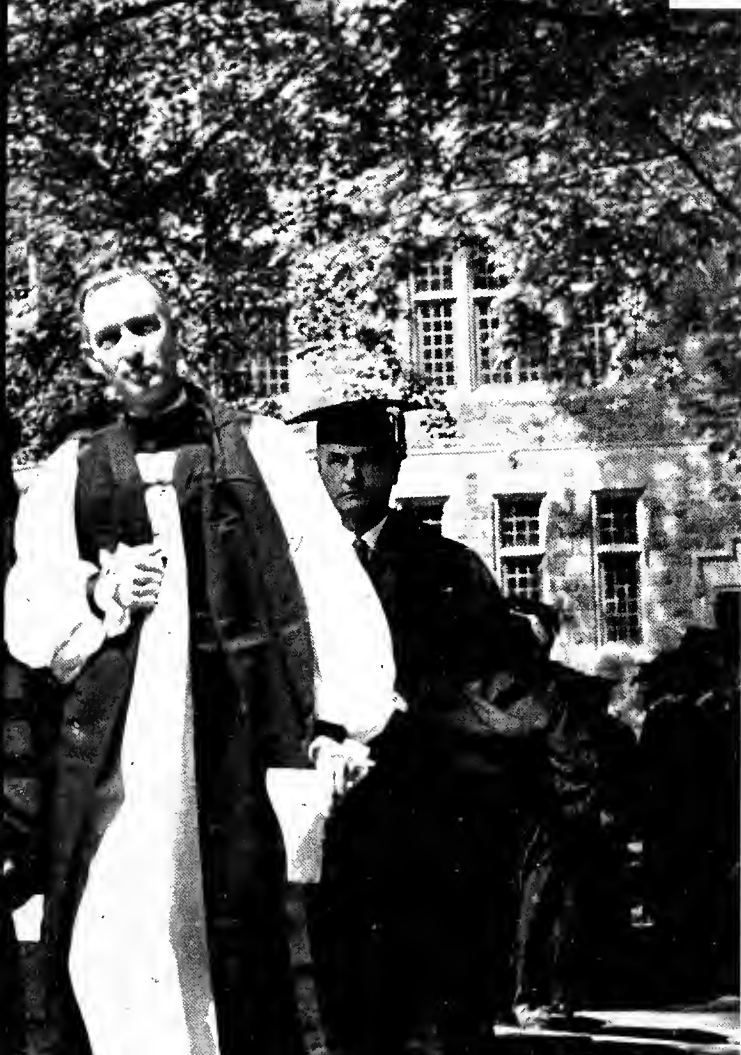

The opening services were conducted by the Very Rev. Roscoe Thornton Foust, Dean and Rector of the Pro-Cathedral Church of the Nativity. The scriptures were read by Dr. Claude G. Beardslee, University Chaplain.

Sunday afternoon, the Seniors wearing their black robes and smoking long clay pipes took their places in the stand erected near the flagpole in the center of the campus and to the delight of the audience enjoyed the traditional class day exercises. Feature of the program was the presentation to Lehigh of endowment insurance policies which will total \$36,000 upon maturity in 1962. This was the largest single class gift in the history of the University. The program was climaxed when the class roll was read and each Senior in turn stood up and

GOWNED COLUMNS FORM AT GRACE HALL ENTRANCE

Was Impressive

DIPLOMAS RECEIVED. THE FINAL MARCH BEGINS

smashed his pipe over the head of the nearest friend.

Monday morning, led by a guard of honor carrying the American and University flags, seniors and faculty members started the colorful parade from the Memorial Building across the campus to Grace Hall where the seventy-fourth commencement exercises were held.

Principal speaker, Dr. Alfred Noyes, famed British poet, chose for his subject "Literature and Life" and said that fifty years ago people had a good tendency toward life and literature, but that recently something has been going wrong with both life and literature. "Terrific changes have taken place in the realms of thought", he said, "and gradually true literature and art has been vanishing until now it is almost non-existent. In the realms of thought today are pseudo intellectuals who decide what people are going to believe and it is because of these pseudo intellectuals that the world today has become largely defeatist in attitude. The downfall in thought is being fostered by the people who want a downfall of civilization."

Dr. Noyes was introduced by President C. C. Williams, who in his opening remarks said, "Never in my memory has a college degree had greater significance than it has today when mechanized and psychologic warfare and accelerated production demand every variety of scientific knowledge that college can furnish.

"When I had the pleasure to receive you four years ago as entering freshmen, although there were ominous portents abroad, there was little reason to suppose that on graduating

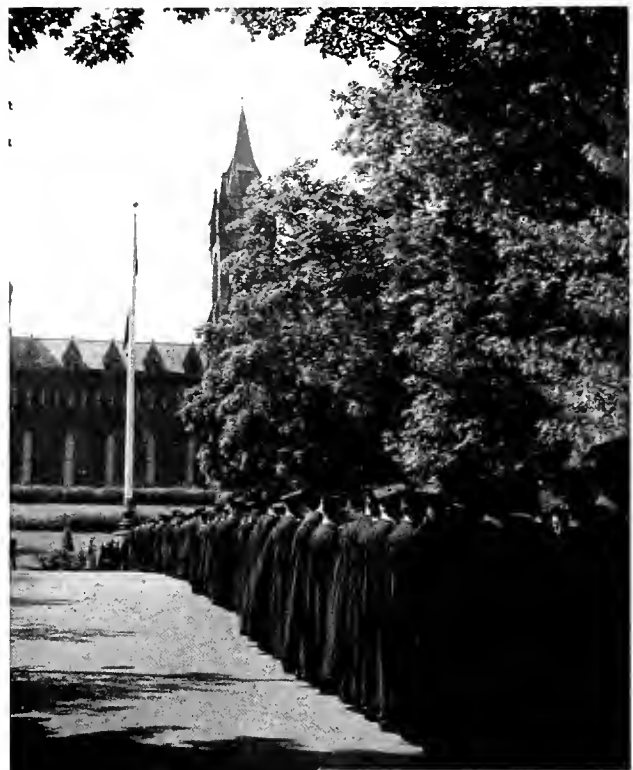

THE USUAL THROGS FILLED THE CAMPUS ROADS

you would hasten to apply your knowledge immediately to defending your country in a mighty struggle. I pray that the war may soon be over so that you may be able to pursue your normal career and life for which you have prepared, but in order that you may do so, the fiendish ideology of dominion through brutality and perfidy rather than through service and collaboration must be purged from world organization.

NO generation can separate itself from its past and its future. You inherit a civilization and culture and you share a responsibility to preserve and pass them on to generations to follow you. So let us fight the good fight to victory to the end that all enlightened peoples may control their governments in the ways of decency and honor inherent in a democratic conscience. Let us be of good courage with a resolute faith in the right and look to the dawning of peace and to a springtime of life's opportunities.

"The new world order must envision the areas of scientific discovery for race amelioration open to intellectual cooperation and creative colonization if another peace is to be more than an interlude. An armistice and treaty may stop belligerency, but peace and brotherhood must be in the hearts of men. Courage and faith will be as essential in peace as in war. We shall need beauty, noble poetry and sublime music to heal historic hates, to lift our souls skyward and raise our vision to universal horizons. Let epics of empire give to hymns of humanity, and the dominion of might make way for the kingdom of God."

TAPS WERE BLOWN AT FLAG POLE CEREMONY

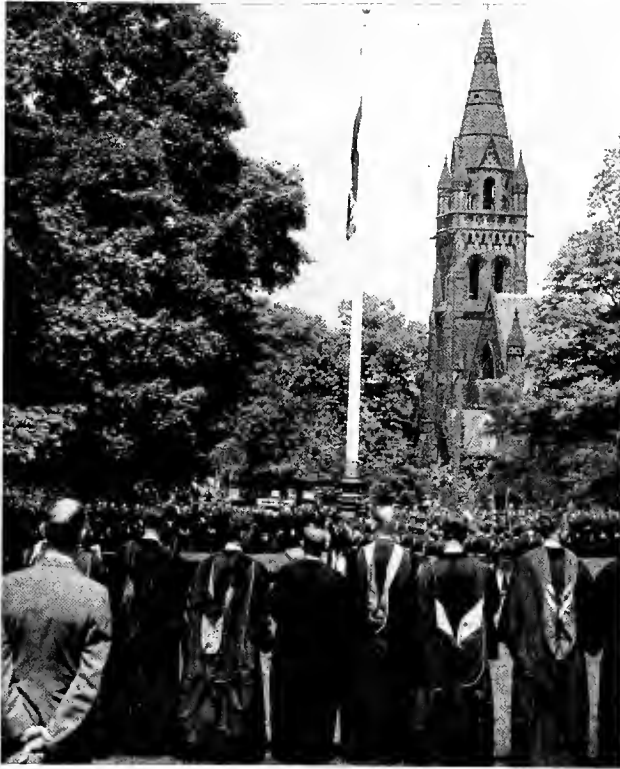

MUSIC BY THE LEHIGH BAND ADDED COLOR TO THE PROGRAM

HONORARY DEGREES WERE AWARDED TO THESE THREE MEN

WITH BOWED HEADS, COMMENCEMENT AUDIENCE

SENIORS AND FACULTY SANG THE ALMA MATER

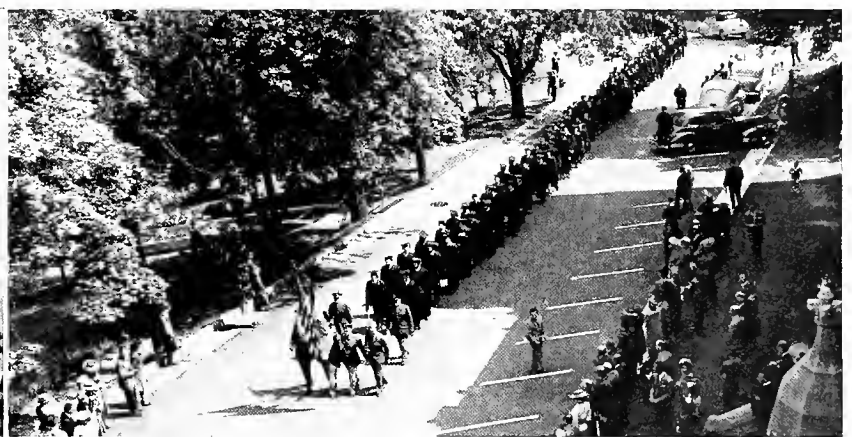

Interesting in the light of the current conflict was the presentation of 75 seniors for commissions as Second Lieutenants in the Officers Reserve Corps. This was the largest number of commissions granted since the R. O. T. C. unit was first established at Lehigh after the first World War. At that time the University was the only institution of its kind that made military training compulsory for the first two years of college work.

Commissions were granted this year as usual in infantry, ordnance, and the quartermasters corps, but for the first time men were commissioned in the air corps, chemical warfare service, signal corps, and the engineer corps. Upon receipt of their commission, the new officers were ordered to report within 10 days for active duty with the troops.

Approved by the Board of Trustees, honorary degrees were awarded to three men whose accomplishments have been particularly outstanding. Recipient of a honorary degree of Doctor of Engineering, Dr. Gano Dunn, is president of the J. G. White Engineering Corporation, New York City and has designed and supervised many giant construction projects. D. Robert Yarnall, who received the same degree, is president and co-founder of Yarnall-Waring Company, Philadelphia, manufacturers of power plant specialties and in 1941 was appointed a commissioner to Great Britain to survey the relief situation there. Third recipient, Donnel Foster Hewett, '02, who received the honorary Doctor of Science Degree is a geologist with the U. S. Geological Survey, a recognized authority on magnesium, and at present is key man of the Survey directing the search for strategic minerals.

OFFICIAL MINUTES OF THE MEETING OF THE BOARD OF DIRECTORS

The meeting of the Board of Directors of the Alumni Association was called to order June 5, 1942 at 1:30 p.m. with the following in attendance: H. J. Hartzog, '04; R. S. Taylor Sr., '95; E. R. Morgan, '03; W. S. Landis, '02; A. R. Glancy, '03; F. B. Bell, '98; J. H. Pennington, '97; L. H. Schick, '37; N. E. Funk, '05; W. R. Okeson, '95; H. D. Wilson, '01; S. T. Harleman, '01; S. J. Cort, '06; C. F. Lincoln, '11; A. V. Bodine, '15; J. I. Kirkpatrick, '29; W. A. Cornelius, '89; W. W. York, '24; J. N. Marshall, '20; Howard Eckfeldt, '95; J. H. Pierce, '10; H. C. Towle, '28; C. L. T. Edwards, '13; H. W. Baldwin, '96; J. W. Maxwell, '26; G. F. Nordenholt, '14, and R. F. Herrick, '34.

It was properly moved and seconded that the minutes of the previous meeting as recorded in the December-January issue of the LEHIGH ALUMNI BULLETIN be approved as read. The motion was carried.

The president then called for the report of the Executive Secretary which was presented as follows:

"This year, for the Alumni Association, has been at once one of the most satisfying and yet disappointing that we have had. Satisfying, because we have succeeded in a number of objectives long desired but disappointing because the year, which at the beginning promised to be one of the most fruitful, soon found us plunged into a war which touched all of our Lehigh men and resulted in a sharp decrease in contributions.

"In spite of the fact that another full-time worker was added to the executive staff this year with a resulting increase over budgeted salaries, we ended the year with a deficit of only \$165.76. I might well add that this additional investment in personnel produced dividends far in excess of its cost.

"One of our objectives for this year was drastically to reduce or eliminate the subsidy of some \$3,000 granted almost traditionally by the Board of Trustees of the University to the Alumni Association. We had \$3,000 remaining from a previous grant of this nature but were determined to hold it as a cash reserve. Necessity forced expenditures totaling \$1,204.66 for equipment, office alterations and a non-operating commitment. When "subsidy time" came around in the spring of this year we had the pleasure of passing by the opportunity to ask for the grant, thus saving the University some \$3,000. It is quite possible that in the course of the next year, if dues contributions continue to be adversely affected by war conditions, it may be necessary to renew the policy of asking the trustees for a grant, although of much smaller proportion than in the past. We hope, naturally, that national affairs will improve to such

an extent in the meantime that this course of action may be entirely avoided.

"Let me say just a word of appreciation for the work which is being done by Leonard H. Schick, '37, who has joined the staff this year as managing editor of the BULLETIN and assistant secretary of the Association. He has grasped the principles of the work rapidly and has been entirely responsible for the latter issues of the BULLETIN this year. Much less tangible but even more important is the increased flexibility of office work which has resulted from having an additional member on the executive staff.

"It would perhaps be difficult to find any organization which has not found its work to be vitally affected since Pearl Harbor. In this respect the Alumni Association is fortunate in being able to undertake, in addition to its usual activities, a three-fold responsibility of cooperation with the war effort. As a service to the armed forces and government we have frequently been able to supply very comprehensive lists of alumni on a basis of most demanding qualifications. These are given the well known "A-1-A" rating so far as the Association is concerned and for this reason we have often been able to give one-day service on long lists complete with current addresses. Conversely, we have been able to be of service to alumni who are interested in offering their services for a particular type of work in the armed forces and have had the intense satisfaction of seeing many of these placed to their own satisfaction and to the distinct value of the branch of the service concerned. Finally, we have felt a natural sense of obligation to those Lehigh men who are in the armed forces and have undertaken to send them a bi-weekly news letter concerning campus happenings which has met with an enthusiastic response from alumni in all ranks of duty. Each month copies of the ALUMNI BULLETIN are sent gratis to reading tables of all armed forces, both for the use of Lehigh men and their friends. It is interesting to note that reports have been received of the BULLETIN circulating on request among many soldiers who presumably have no connection with the University whatever.

"It is probably needless to say that there has been intense satisfaction for those of us in the alumni office in bringing Lehigh's story directly to her sons and in noting, year after year, the increased response from greater numbers who are realizing that through gifts, small or large, they can give a tangible vote of confidence to the Alma Mater whose success is so intimately associated with their own."

The report of the Treasurer was presented by Walter R. Okeson, '95. For details of the treasurer's report see the minutes of the Association meeting held Saturday morning.

Reporting for the Alumni Day Committee, Robert F. Herrick, '34 Executive Secretary, expressed regret that Walter

Schrempel, '14, chairman of the committee was unable to be present. He briefly explained the program which was carried out as reported in the first pages of this issue.

President Hartzog then called upon Robert S. Taylor Sr., '95 who presented the treasurers report. This report follows and was accepted as read:

The president then called upon George F. Nordenholt, '14, chairman of the Alumni Bulletin Committee, for his report. The Bulletin Committee report follows:

"Despite increased production costs, the Lehigh Alumni Bulletin has enjoyed a successful year, and has cooperated in every way with government agencies seeking information of importance to the national effort.

"Editorially there have been no major changes in the format of the magazine. The editors have strived to keep the contents interesting to all alumni and consequently have avoided too many articles of a strictly technical nature. Pictures and layouts have been used extensively in every issue this year.

"A new feature 'Life Among the Lehigh Men in the Service' was inaugurated in the October issue, and received such enthusiastic response that it has been continued as a regular feature. This feature contains stories about Alumni in the various branches of the armed service, together with pictures, and names and addresses of more than 400 men. Credit must be given to the publicity departments of the army and navy who cooperated by furnishing many pictures of action.

"To supplement this feature, the BULLETIN staff is writing bi-weekly letters to all alumni in uniform. These letters which are three mimeographed pages in length, deal entirely with Lehigh University and campus activities, and are written in a personal style. Thus far about 35 letters and cards have been received from alumni telling how much they enjoy these letters.

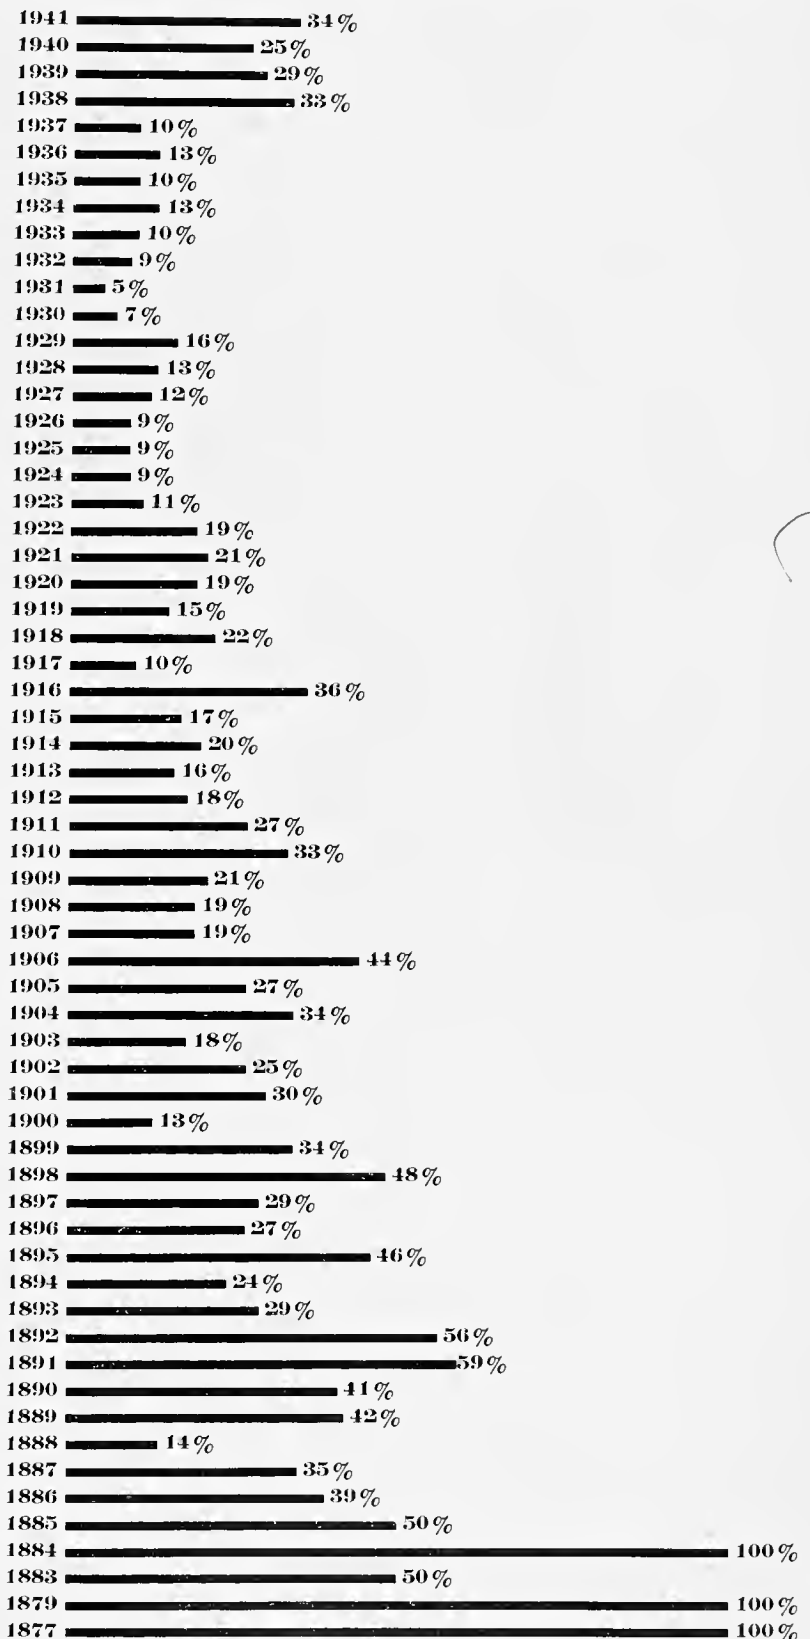

"Last fall as a circulation appeal, the BULLETIN staff, operating from the press box in Taylor field sent out play by play accounts of Lehigh's home football games. The plan offered was that immediate subscription to the BULLETIN would continue the receipt of these game accounts. All letters were prepared in the press box, and were in the mail within an hour after the final whistle. The plan worked very well for the first two weeks, and then died a natural death when the team continued its losing streak. It is hoped that the plan can be resumed next fall.

"Financially, the BULLETIN was able to 'keep its head above water' and after seven issues had been published showed a net profit of \$814.50 This is the highest profit in recent years and after expenses for the June and July issues are paid, the staff is confident that the total profit for the year will amount to \$1,000.

"The BULLETIN circulation is approximately 2,700 at the present time and despite

The Final Standing of Class Campaigns

Here are the final records in the Council of Class Agents' 1941-42 Alumni Fund campaign. Figures indicate the percentage of men in each class who made a direct gift to Lehigh. This chart is a visual graph of figures found on page 39.

the fact that many of the younger alumni are in the army, and thus unable to subscribe, this figure is comparable with that of past years. The gain in circulation revenue, as of May 27 was \$447.50. On May 27, 1941 the subscription revenue was \$4,564, and on the same date this year the total was \$5,041.50.

"In past years, many alumni subscribed to the BULLETIN with the promise to pay in the future. Most of the men did pay, but this plan necessitated constant billing and filing by the office force. This year the idea of "promised subscriptions" was discouraged, and a cash on the line plan adopted. Thus far it has worked very well, and at the present time less than 20 so called "promised-men" remain on the list.

"Advertising revenue and volume also showed an increase this year of \$462.31. Very few old accounts were lost and a few new ones gained. Several free advertisements were given government agencies seeking trained men to fill vacancies in their organization. The BULLETIN advertising contract with the Graduate Group, our national advertising representative expires this year, and will not be renewed because very few accounts have been secured by this organization in the past two years. Instead the BULLETIN staff meeting with representatives of Rutgers, and a Mr. H. B. Knox Jr. '16, formulated a new combine which will comprise many of the eastern colleges. Mr. Knox's advertising agency will serve as the national representative of this group. While Mr. Knox does not promise a miracle, the BULLETIN staff is confident that this new organization will produce for better results."

"All of these things are obviously probabilities with which we can cope only through frequent meetings of our committees, councils and officers as each emergency becomes well defined."

The report of the Prospective Students Committee was presented by S. T. Harleman, '01 as follows:

"Early last fall your Prospective Students Committee recognized the many uncertainties which confront boys in the senior year of secondary schools. The original year of training under the Selective Service Act had been extended; the international scene was clouded; and industry was making strenuous attempts to adjust itself to artificial and unaccustomed demands. Your Committee was convinced that students eligible for admission to colleges were more than ever in need of personal counsel. Accordingly, we conceived the plan of creating in each community where Lehigh is represented by active alumni, a group of Lehigh men who would volunteer to talk with high school and preparatory school seniors and give such boys first hand information about the type of training which is available at Lehigh and encouraging those boys to consider what Lehigh can offer, not only in preparation for the artificially abnormal years in the immediate future, but in laying a foundation for the careers which they might undertake after the return of more normal times.

"To this end, your Chairman secured from each of 28 Lehigh alumni living in major cities from which Lehigh draws students an agreement to serve as "Headman" in his community. As "Headman", each alumnus agreed to refer to an appropriate

alumnus in that area such names of students as might be sent to him by the Office of Admissions and to report to the Director of Admissions his impression of the personal qualifications of the boy and the likelihood of the boy actually coming to Lehigh.

"All of this happened before December 7. After Pearl Harbor, it was immediately evident that the college calendar would neces-

Still Very Much Alive

Reported dead in a War Department release published in the May issue of the BULLETIN, Colonel Daniel H. Torrey, '08, writes that he is in the Adjutant General's Department and is on full duty status at the Headquarters, Second Corps Area, Governor's Island, New York.

sarily be the subject of drastic revision and there was real question for some time as to the extent of reorganization in all colleges. The Director of Admissions, because of his inability to say definitely just what the program at Lehigh would be, decided not to ask our alumni to go to the trouble of looking up college prospects when answers to inevitable questions by those prospects were not available. Accordingly, no requests for services by these alumni were sent from the Office of Admissions until the college year was well advanced and until these alumni had felt the devastating effects of the war picture as fully as had the University. Several of the "Headmen" responded immediately to the first communication from the Office of Admissions and we are confident that the organization set up by the Committee, although delayed and disturbed by events of the winter, will be in a position to function effectively and profitably for the University during the months to come.

"That there is need for such cooperation is painfully evident: Estimates from the American Council on Education in Washington suggest a decrease in college enrollment for the coming year ranging anywhere

from 5 to 25%. Harvard University is reported on excellent authority to have set up a budget for the coming year which involves an operating deficit of \$1,250,000. Colleges of Arts and Science throughout the country anticipate reductions in enrollment up to 60%; Colleges of Business Administration have in some cases abandoned the traditional program of training for Business Administration and diverted their resources to specialized activity, such as the quarter-master training corps now conducted by the Graduate School of Business at Harvard; and graduate schools have all but suspended activity. Colleges of Engineering are in a more favorable position to withstand the uncertainties of the next few months, but the competition for enrollment in those colleges has assumed proportions heretofore unknown. New scholarship funds to be awarded to new students have been multiplied at Princeton, at Yale, and at Harvard. The June Achievement examinations of the College Entrance Examination Board have been discontinued and the "Ivy" colleges are admitting freshmen this year on the basis of aptitude tests offered in April.

"The so-called accelerated programs offer a bewildering, sometimes fantastic, variety of schemes to attract students and rush them through to baccalaureate degrees.

"Lehigh's accelerated program is one of the best in the country. It is not a short cut. It is really a continuous session program, rather than an accelerated program. Students at Lehigh who elect the continuous session program receive the same number of instructional exercises and have the same time for preparation of work as do students who elect to remain in the conventional fourth year program.

"In a sense, your Committee on Prospective Students feels that every alumnus of the University is *de facto* a member of this Committee. Enrollment in Arts and Science and Business Administration seems likely to be reduced by 30%, because approximately 50% of our students have elected the continuous session program, and there is a possibility of admitting a larger number of students to the College of Engineering without taxing present facilities. The number of applicants for admission to Lehigh next September is approximately the same as the number of applicants at this time last year. Lehigh can accommodate—Lehigh needs more—good applicants.

"Early in January the Committee on Admissions recognized the probability that many competing colleges would lower standards in an attempt to maintain or bolster enrollment. The Committee gave careful consideration to the likelihood of reduced enrollments at Lehigh and decided unanimously to maintain the present quality standards of requirements for admission to the three colleges of Arts and Science, Business Administration, and Engineering at Lehigh University. In order that the facilities of the University might be made available to students who might profitably do work on the campus, however, a new classification of students known as the General College Division was recommended to, and approved by, the faculty and trustees. In the General College Division, students may undertake specialized work or general courses without becoming candidates for a degree. The program for each student in the

MOLYBDENUM ENLISTS FOR THE DURATION

The enormous increase in requirements of molybdenum has necessitated the War Production Board Order M-110, placing molybdenum consumption under allocation control...Our metallurgical research staff is fully engaged in war work. General College Division will be determined on the basis of scholastic work, aptitude tests and practical experience. The General College Division is thus available to men who wish to do a limited amount of work in such specialized fields as geology, chemistry, accounting, physics or any other particular field. It is also available to students whose qualifications for admission to a regular program are doubtful. Students who do satisfactory work in the General College Division may be transferred from the General College Division to one of the three colleges of the University by favorable action of the Committee on Standing of Students."

A comparative statement showing receipts in the form of Dues, BULLETIN Subscriptions, Contributions to Student Grants and the Fund was presented to each member of the Board of Directors. In commenting on this statement and the efforts of the Class Agents in general, C. L. T. Edwards '13 made the following observations.

"It was anticipated by the Class Agents at their dinner in November that, substantially, most of the receipts for 1941-42 would come in prior to March 1st. That is the way it worked out, but we have been greatly encouraged lately, because, since about ten days ago, receipts have been averaging close to \$300 per day.

"In my opinion it is the total receipts that count. One institution whose performance we have been following closely has had a Class Agents Organization for twenty-six years and now has three paid representatives. If we are to do a job therefore, it seems obvious that we must find ways and means of informing our alumni of Lehigh activities, and the best way to do this is by obtaining a wider distribution of the BULLETIN. This is a selling job and we must inform our people of what we have to offer.

"It is my earnest belief that we should be able, in normal times at least, to obtain \$150,000 per year from our alumni. If we go after this in the right way, and with the thought we are going to get it, we should do so. It will take time to build up to our objective but it can be done.

"We will not be able to really appraise our performance of the past year until we have had time to review the accomplishments of several other institutions. Federal taxation has imposed a burden on our efforts but appears to have reached the point where it seems possible to capitalize on the individual's right to 15% income credit for contributions.

"We have concentrated much of our effort on the strengthening of our organization. Three of the older classes do not have Class Agents but we are hopeful of obtaining strong representation for them before long."

On request from Mr. Hartzog, Mr. Edwards read off the list of eleven proposals that he hopes to have approved and put into practice with the object of making better alumni of our students. The Board approved the proposals submitted and voted to refer them to the incoming Board with the recommendation they be given serious consideration. While an excellent job is being done, especially by Dr. Beardslee, in

NEW Developments In Molding and Core Sand Reclamation

Through continuous research and experiment, Link-Belt foundry equipment engineers are ever developing new processes, new methods and better mechanical equipment to conserve materials and increase efficiency and production. In the field of molding and core sand reclamation, the two systems illustrated and described on this page are typical.

We welcome the opportunity of working with you toward the goal of speeding defense production through better sand preparation and reclamation, core, sand, mold and castings handling methods.

High Temperature Process with Rotary Kiln and Cooler

(Patents Pending)

This is a new and revolutionary process of renovating and reclaiming used foundry sand. In actual performance it has produced a product as clean and at times cleaner, than the original sand. The method consists essentially of granulating the sand lumps and heating to temperatures which remove carbonaceous and other foreign material and then cooling for reuse. Let us tell you more about the advantages of this new method.

8750-A

← Mechanical Screening in Combination with Air Classification

The drawing to the left is of a recent Link-Belt installation in a steel foundry where the former practice required a large consumption of new sand for new sand facing. This handling and preparation unit is recovering for reuse a high percentage of this new sand through proper screening and air classification of the shakeout sand heap.

LINK-BELT Sand Preparation EQUIPMENT

obtaining participation in the Senior Insurance Plan, ways and means must be found to provide for those who, otherwise, would fail to subscribe to the plan.

The proposals made by Mr. Edwards follow:

1. Advocate reinauguration of the College Meeting, to be held once a month.
2. At least one prominent alumnus to attend each College Meeting and be prepared to deliver a brief, but well prepared, address.
3. A working liaison between the ALUMNI BULLETIN and the Brown and White. Student article to appear in each issue of the BULLETIN and an Alumni Column to appear at least twice per month in the Brown and White.
4. A select number of alumni to receive the Brown and White regularly so as to catch the student pulse, and to be prepared to communicate with that periodical as inspiration may prompt him to do so.
5. First, second and third prizes to be awarded students on their contributions to BULLETIN during the year.
6. Encourage undergraduates to invite alumni to speak at their banquets.
7. Undergraduates (particularly juniors) to be urged to attend meetings of the Alumni Association.
8. Work out a plan without delay, whereby all students will receive the BULLETIN.
9. Short news items pertaining to alumni accomplishments to appear in the Brown and White periodically.
10. Student guests to appear at featured alumni club meetings by courtesy of the Alumni Association or of the particular club.
11. Within the next several weeks, alumni (preferably Board of Directors) to give dinner to recognized leaders of the undergraduate body; Arcadia to present a limited list for attendance.

E. Robins Morgan, '03, reporting for the Placement Committee, gave an encouraging report so far as student placement among engineers was concerned. Here, 99.5% or 194 out of 195 graduating engineers found positions, either with industry or in the service, while only 56% of arts graduates and 54% of business seniors were placed at this time. It was interesting to note that 31.8% of engineers are now in the service while 28.9% of business and 20% of arts graduates are involved with the armed forces.

The grand total of 1942 graduating seniors placed was 80.9%, which falls short of the 92.6% placed last year, although comparing favorably with 64% in 1940, 53% in 1939 and 48.2% in 1938.

The report of the Student Contact committee was presented by John W. Maxwell, '26, who prefaced his remarks with "no report" and in all seriousness recommended the dishonorable discharge of the chairman of the committee and the appointment of a successor next year who may accomplish something.

He then "classified" himself as the hypothetical armchair executive who sits with his feet on the desk and has someone else do the work. For this was just about the role he "took credit" for playing in a very

significant activity which is under the wing of this committee—the endowment insurance plan to which 144 members of the graduating class subscribed and which if carried out with reasonable expectations should net the University upwards of \$30,-

Two New Bequests

LEHIGH has received bequests from two men who during their lifetime were her most devoted and loyal alumni: Samuel Dexter Warriner, E.M. '90 Eng.D. (Hon.) '28 and Charles Lewis Taylor, E.M. '76, Eng.D. (Hon.) '19.

Mr. Warriner, who died on April 3, 1942, provided in his will for an outright bequest of \$50,000 for Lehigh, the principal to be held in trust and the income used for such purposes as the Trustees may determine. In addition he established several trust funds and named the University as contingent beneficiary in each case.

For the thirty years preceding his death, Mr. Warriner served as a corporate trustee. For the last twenty years, as chairman of the Finance Committee, he was responsible for the management of the endowment funds and finances of the University. All of the credit goes to him for the excellence of the financial management during the last two decades.

The bequest of \$46,100 received from the Estate of Charles Lewis Taylor is to be added to the Taylor Gymnasium Endowment Fund.

Prior to his death in 1922, Mr. Taylor established the Taylor Gymnasium Fund with a gift of \$25,000 to help operate and maintain the Taylor Gymnasium and Field House which he had previously donated and named the University as one of the beneficiaries. The bequest now received follows as a result of the death of his widow last December.

During his lifetime, Mr. Taylor was always active in the interests of his alma mater. He served as corporate trustee from 1905 until his death; previous to that he had been an alumnus trustee for ten years and president of the Alumni Association. It was in his name that his partner and good friend, Andrew Carnegie, donated the funds for the building of Lehigh's first dormitory in 1907. The dormitory, gymnasium, field house and endowment fund are only the tangible evidences of the part Mr. Taylor played in building up the University.

000 at the twentieth reunion of this year's class.

Mr. Maxwell attributed the increasing success of this plan, which has now been carried out for the past five successive graduating classes, wholly to the efforts of Dr. C. G. Beardslee, professor of Moral and Religious philosophy and to Charles K. Zug,

'26, who represents the Prudential Insurance Company in the sales campaign each year. Mr. Maxwell pointed out that the true classification of Dr. Beardslee should be the "students friend" rather than the formidable title given above. According to the chairman of the committee, it is Dr. Beardslee who has sown the seeds which have guaranteed the success of this plan each year, and Mr. Zug who has done the major share of the "leg work". He was quite emphatic in his claim that the success of this plan has been entirely the result of work by these two individuals and John I. Kirkpatrick, '29, assistant to the president, and that he as chairman of the committee deserves no credit whatsoever along this line.

Since the Student Contact committee's efforts should not be confined solely to financial endeavours, Mr. Maxwell recommended that this insurance promotion activity be delegated to a sub-committee formed expressly for this purpose under the chairmanship of Dr. Beardslee.

A brief resume of the operations of the class endowment plan over the past five years concluded the report of this committee. For the first three years the number of subscribers ranged between 93 and 97, while last year it rose to 136; and this year to 144. It was brought out that none of the policies now in force have been permitted to lapse through non-payment of premiums. In the relatively few cases where individuals have not been able to meet these payments, the slack has been taken up by a reserve in the respective class treasury. So it can truthfully be said that this wholesome plan is progressing steadily and should result in the University receiving the equivalent of the annual income on approximately three-quarters of a million dollars starting fifteen years hence. It is presumed that this sum will be turned over by these classes successively to the general funds, although its disposition does lie within their jurisdiction.

President Hartzog then reported on a resolution adopted at the fall meeting of the Board and which concerned the Administration's attitude on Alumni Student Grants. Mr. Hartzog said that according to the action of the Board he had communicated with President Williams and had received a letter clarifying the University's position. This letter which was read by Mr. Hartzog follows:

"Your letter inclosing a resolution of the Board of Directors of the Alumni Association was received and I have considered them in the light of our subsequent conversations. I appreciate the fine spirit on the part of the Alumni Association and am glad to attempt to define "my attitude toward the Student Grant Plan and Alumni activities designed to promote and achieve its objectives.

"The objective of the Plan has been frequently stated to be to procure students of all-round abilities at Lehigh, physical as well as mental. I am heartily in accord with that objective and have cooperated with alumni activities designed to achieve it. If I had thought the objectives were harmful, I should have felt duty bound to oppose the Plan.

"However, I think it desirable to amplify this statement somewhat because in actuality the objective may tend to shift solely to

NORTON ABRASIVES

Tanks. They are coming off the assembly lines at a speed that is astonishing the world, bringing confusion to the enemies of freedom. Tanks, and more tanks built at high speed.

Grinding. Hundreds of tank parts require close precision—require precision grinding—and here NORTON ABRASIVES are perfectly at home.

NORTON ABRASIVES are made to meet all the exacting requirements of the complex tank construction—always on the job whether working within tolerances measured in millionths of an inch, or working on the rougher jobs such as finishing welds on the treads of these traveling fortresses.

WHEN IT'S AN ABRASIVE PROBLEM, CALL IN NORTON ENGINEERING

BEHR-MANNING DIVISION, TROY, N. Y.
(ABRASIVE PAPER AND CLOTH)

procuring football players. Subsidization of athletes as such had robbed intercollegiate sports of their finest values in American colleges and I should not wish to be understood as approving such a policy.

"The Plan is an Alumni project. Their right to set up and administer such a plan, I fully recognize so long as it does not harm the University. As devised, it does not touch the budget nor the academic standards of the University. A university is "an association of scholars"—faculty, alumni and students—and its policies should be composite. A president would be unwise to undertake to "run" the University, and especially should he not undertake to dictate the acts of the Alumni Association, which should formulate its considered policies and feel the responsibility for their effect on the University.

"Although the Plan is an Alumni enterprise, it does concern the University. I have wholeheartedly endeavored to cooperate to make the Plan successful. The Plan was discussed at a faculty meeting on inquiry from a dean. At that meeting I explained the purposes of the Plan so favorably that some of the faculty thought I was a protagonist. The faculty eligibility committee accepted the distinction which I drew between a grant by alumni and a scholarship from college funds awarded by the University. The Director of Admissions with my approval cooperated with the Grants Committee to insure the scholastic quality of students recommended by the committee. The football coach, with my approval, advised with the committee in the selections. I took this position because I wished the Plan to have every chance to be successful in procuring the all-rounded type of students sought. I believe that any disappointment that may have occurred can not properly be charged to any lack of cooperation by the University administration.

"As for my judgment, however, I have not been so sanguine as the sponsors have been as to the probable success of the Plan. Some fifteen years of rather close contact with the administration of athletics at other universities have caused me to doubt that the Plan would fully solve our football problems.

"1. When some players are known to receive pecuniary compensation from any source and others do not, dissension on the team may prevent good team work. I knew one team to mutiny under these circumstances.

"2. When alumni contribute money for a team, their disappointment in defeats is increased so that pressures may be undertaken to introduce practices that are objectionable.

"3. Students with genuine interest in the game sometimes are discouraged in striving to make the team and as a result some team spirit is lost.

"4. The Plan is so mild in comparison with what many other colleges are doing that it may not procure the best players, and the chief effort is likely to be to stimulate opponent colleges to even greater measures of subsidization.

"The Plan has been widely publicized and has given erroneous impression in athletic circles that Lehigh is embarking on a high

pressure football policy, somewhat to the disadvantage of the University.

"Finally, I consider the Plan honest and above board, and as designed, not inimical to scholastic standards. I am too eager to have Lehigh teams make a creditable record on the field and am hopeful that the Plan may tend to restore the normal incidence of students interested in sports to the Lehigh register, that incidence having been depleted by policies of favoritism which have attracted some athletic students from Lehigh enrollment. Some of these colleges are dependent for their hope of public attention on the prowess of their football teams. Happily Lehigh renders such educational service to society that its place in public esteem is not determined by its athletic teams. In the six years of my administration every Lehigh varsity player who made his 'L' has graduated with his class,—an exceptional and significant record.

"Unfortunately, a wholly satisfactory policy relative to intercollegiate athletics just does not exist because opposing and incompatible desiderata are sought. No college to my knowledge has a satisfactory plan, for all are in turmoil. If Lehigh would define its competition more sharply and decline to meet any college with distinctly inferior standards a way to progress would be opened. This would require courage and tenacity of purpose. It is impossible to set the athletic picture of a quarter century ago in the college scene of today. Even a fair solution requires maturity of judgment and clarity of objectives based on present conditions.

"I apologize for this long reply, but a brief generalized statement did not seem to suffice. Also, the delay in reply is in accord with our conversation and at your suggestion."

Nevin E. Funk, '05, Chairman of the Alumni Student Grants Committee, presented his report which reads as follows:

No doubt those alumni who have contributed to the Alumni Student Grants fund are extremely interested in knowing the financial status of this fund since the inception of the plan in 1939. The following table is presented to show the receipts for the three years and the expenditures which have been made for Grants for the last two years.

	1939-40 June 11	1940-41 June 5	1941-42 May 30
Regular Receipts	\$4,747.96	\$4,727.20	\$4,201.75
Special Receipts			5,000.00
Total Receipts	\$4,747.96	\$4,727.20	\$9,201.75
Unexpended balance carried over from previous year		4,564.40	7,104.60
Balance before expenses	\$4,747.96	\$9,291.60	\$16,306.35
Expenses of current year	183.56	2,187.00	5,799.88
Fund at end of year	\$4,564.40	\$7,104.60	\$10,506.47

The increasing balance in bank each year seems to indicate that the finances of this Committee are in fine shape. This, however, is far from the case, as is shown by estimating the expenses for the next three years and the status of the fund, assuming that an average of \$4,500 per year is donated to the fund by the Alumni, which is greater than has been received this year to the end of May.

<i>Expense Estimate for the next three years</i>	
Class of '44, 6 men, 2 years	\$ 4,400.00
Class of '45, 7 men, 3 years	10,800.00
Class of '46, 3 men, 3 years	6,000.00*
Class of '47, 3 men, 2 years	4,000.00*
	\$25,200.00

* Assuming \$2,000 per year.

<i>Income Estimated for next three years</i>	
Annual Income \$4,500 per year	\$13,500.00
Fund at end of 1942 Fiscal Year	10,500.00
	\$24,000.00

It is very evident that unless the income for this plan can be very materially increased above the present amount that the plan is doomed to failure. The only reason that it is not now on the road to bankruptcy is because we collected one year's income before starting to spend any money and received a gift of \$5,000 from one man. The first cause cannot be repeated, and good judgment cannot allow us to depend upon a repetition of the second.

This means we must reduce the number of men helped to about two per year for the next two years and then cannot have more than a total of about 10 men.

Should the desirable type of men need maximum help, the number would be reduced to seven. Even with the freshman rule held in abeyance this is an insufficient number of men.

I am sure that everyone is in agreement that a situation of this kind cannot produce good teams, resulting in a poor showing in football and in the end be responsible for a further falling off in income which will spell failure in a short time.

The Committee has from the beginning insisted that the money available to it shall be sufficient in amount to assure the men to whom initial Grants are made that they can expect four years' aid if they live up to their part of the agreement. Therefore, commitments cannot be made unless the Committee is on a sound financial footing, which would not be the case today from the gifts of the alumni body except for the single gift of one alumnus. If the alumni are really interested in better football teams, then as individuals they must financially support the plan, not necessarily with larger

individual contributions, but with contributions from a much larger number of the alumni. A total of 438 men subscribing to the Alumni Student Grants is entirely too small a percentage of the entire alumni body.

The following table which shows the contributions by areas is an indication of

(Continued on page thirty-four)

Honor Roll of 1941-'42 Active Lehigh Men

The complete record from June 1, 1941 to June 30, 1942 of Alumni who contributed to either dues, BULLETIN, Student Grants, or the University Alumni fund.

With ONE VOICE for VICTORY

SERVICE IN THIS CRISIS IS OUR PATRIOTIC DUTY

All honor to our men and women in the armed forces—and in justice to those who gladly offer their all in the service of our country. WE ALL must back them up on the home front and on the production lines. We of Minneapolis-Moline will do everything in our power to give to those in the armed forces good things to work with and fight with.

Service in a Crisis Made Them Symbols of Democracy
In the heart of South Dakota's beautiful Black Hills, carved from solid granite mountains is this Shrine of Democracy in honor of the leaders who served our country in times of crisis. Their memory, too, is carved in the hearts of all Americans. Today's leaders, too, are carved in the hearts of all Americans. We of Minneapolis-Moline will do everything in our power to give to those in the armed forces good things to work with and fight with. We of Minneapolis-Moline will do everything in our power to give to those in the armed forces good things to work with and fight with.

Men and Management

THE UNION SPEAKS

America is at war with the Axis powers. Our land of liberty is in danger. There-yesterday our immediate objective was the constant improvement in living standards, today that objective, as firm as ever, is secondary to our desire to smash Fascism and preserve democracy.

Today's war is not only a battle on the military front but also a battle of

REMEMBER PEARL HARBOR

THE MANAGEMENT SPEAKS

WE ARE AT WAR! and all of us here are fighting for our country on the PRODUCTION LINES, while many of our loved ones and friends are on the FIGHTING FRONT. THIS—we of MINNEAPOLIS-MOLINE realize with out stint . . . We'll know no peace until VICTORY is ours.

We of Minneapolis-Moline don't prepare for war in time of peace. VICTORY is ours.

hips, planes, tanks, guns, and shells must be supplied to the United Nations and a second front immediately established on the European continent engaging the heart of the Axis forces from two sides. A steady stream of supplies must flow across the oceans to our soldiers.

We are proud to announce that our Union has wholeheartedly joined with the Minneapolis-Moline Power Implement Company in forming Labor-Management Committees to devise ways and means to increase production, thereby applying sinews of war for the United Nations.

With this objective in mind every member of our Union pledges to give the utmost effort of body and brain to establish all-time production records.

We will unite with all forces which have the defeat of the Axis Powers as their goal, we will oppose the appeasers wherever we find them and will not permit any interference with the all-out production program. A struck plant is of no more value to the all-out war effort than a bombed plant, so therefore, "strikes as usual" are out. For the duration, we have laid away our strike weapon.

The Labor movement will make all necessary sacrifices to win this war. This war is a people's war, it is our war and we gladly assume our responsibilities to help defeat the Axis Powers.

100%—That's the record of MM employees when it comes to buying United States War Savings Bonds and Stamps every PAY DAY—We're on the Payroll Savings Plan 100%. Every cent and dollar invested in War Savings Bonds and Stamps WILL help the boys in the front lines do a better job for all of us Assure an earlier victory and make our future more secure.

© B & B

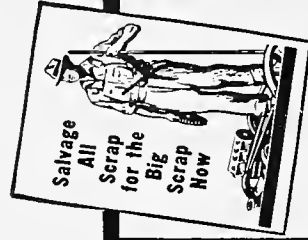

or what we may plan for the future? In management and man-power of Minneapolis-Moline realize that economic co-operation in this struggle for our way of life and future freedom means the recognition of the interdependence of all forces working toward (1) the Winning of the War (2) the Preserving of the peace when VICTORY is ours

Along with our ARMED FORCES, Labor Industry and Agriculture are the forces vitally concerned. Without co-operation of labor, industry and agriculture are stopped; without maximum agricultural production, labor and industry are vitally affected. Therefore, co-operation is essential so that victory may be wrought . . . and the only kind of peace acceptable to free men is established.

Minneapolis-Moline and its man power are truly one in the production of machinery for our armed forces, for the farm and for other industries vital to the war effort. All have steadily worked to maintain a spirit of justice and good fellowship. This mutual co-operation has meant much in the production of the "VITAL TO VICTORY" goods we make.

All at Minneapolis-Moline have sought to maintain a healthy attitude of "Give and Take"—realizing that these things are our essential jobs—(1) to build first quality products speedily for our armed forces who will lead us to victory, (2) make first quality tractors and implements for farmers who will produce the food for freedom, and (3) produce first quality machines for other industries, who, in turn, will also produce essential war goods.

W. C. MACFARLANE, '04
President

Our War Industries need metals of all kinds—zinc, copper, lead, steel, iron, aluminum, tin and also rubber, paper, rags, etc. Clean up your homes and places of business and sell or give to and for the sake of Victory and our own Way of Life. Now is the time to do it.

the interest of the alumni in different sections. Certainly there is very little in the table which could lead any one of the areas to feel they had done anything outstanding in so far as their interest in this plan is concerned.

Contributions by Areas (nearest dollar)

	1940	1941	1942
Bethlehem	\$828	\$1058	\$1063

Southern New England	59	18	38
Various Classes	34	179	341

The Grantees as a group have done well in keeping up their scholastic standing. In the entire group there is only one man who is on probation. A table of the standing of the various Grantees is presented in which letters have been substituted for students' names, because the Committee feels it is not desirable from the point of view of preserving the boys' relations on the campus to broadcast the names of those receiving Grants.

From time to time various members of the alumni body have expressed the feeling that the faculty of the University was not fair to athletes; that a student who was athletically inclined had more difficulty in keeping up his college work than one of equal ability who was not. The Chairman of this Committee has had contact with the various members of the faculty, and personally wishes to express his opinion that this attitude on the part of the alumni is far from representing the truth.

In the alumni body are men who are opposed to this Student Grant Plan and also to athletics of most any type, and it is not surprising to find that some of the faculty

may hold the same attitude, but so far as the faculty body is concerned, they have the same degree of interest as the alumni in winning teams, but neither they or any thinking Lehigh alumnus has any desire to subordinate the scholastic standing of the University to athletic endeavors.

We have two very good examples this year to prove that inability to keep up with their college work lies much more in the individual student than it does in the faculty. As an example. Student B of the Class of 1944 at the end of his first semester had an average grade of .88. His performance was discussed with him by his coaches and a member of the Alumni Student Grants Committee, and it was pointed out to him that he was not conscientiously carrying out his part of the agreement. This same student had a grade at the end of his second semester of 2.33. With an unsympathetic attitude on the part of his instructors he certainly could not have performed this exceptional reversal of form. Student F in the Class of 1945 who had a grade of .41 at the end of the first semester surprised everyone by finishing the year with a grade of 1.12. While this grade is not one about which to boast, it still shows what a student can do if he makes up his mind to actually go to work on his subjects. In addition to this, it would seem that the grades which the different Grantees have made really speak for themselves by indicating that any boy who really desires to obtain the education which Lehigh University provides can get it without his athletic ability being any detriment to him.

The Committee has felt that its essential duty is that of supervising the distribution of the Alumni Student Grants fund, and that it is in no sense a collection agency. To be perfectly free to apply unbiased judgment in the choice of recipients of the grants it is essential that the Committee should not be too closely connected with the raising of money in any one locality, and while the members of the Committee are enthusiastic supporters of the plan, the Committee as a whole should not lead in a drive for the collection of subscriptions. This, therefore, puts it up to the Lehigh clubs and to the individual Lehigh alumnus to either make this plan a success or a failure.

Clifford F. Lincoln, '11, chairman of the Alumni Student Grants Collection Committee, reviewed briefly the history of collections under the Alumni Student Grants Plan leading up to the present arrangement where the primary responsibility falls upon the clubs and where each club president is responsible for collections in his particular district.

He further pointed out that the original hopes of the committee were that the monies received under the Alumni Student Grants Plan would be far more than has been actually collected during the three years of the existence of the plan and pointed out that of all clubs cooperating, only Bethlehem had continued to increase its giving in 1940, '41 and '42, this year having reached a total of \$1,063. He pointed out that most of the clubs had dropped

appreciably from the totals of the first year of the plan and questioned whether alumni had shown sufficient enthusiasm to really indicate that they were behind the project. Commenting on Mr. Funk's report, he explained that the committee had done everything within its power to carry out the original intentions of the plan and that he felt more than satisfied with the progress made in this field. He further emphasized Mr. Funk's contention that the faculty and administration had not hampered the progress of the plan and that the prime responsibility for its success or failure rested upon the alumni.

After consideration of all class averages based on percentage of dues payers in each class the Active Membership trophy was again awarded to the class of 1895.

The matter of the determination of the Alumni Fund project for the fiscal year 1942-43 was then considered, and the Board agreed that due to the uncertainty of the times it would be best not to definitely allocate the fund for next year.

The Board also resolved that Article III, Section 8, of the By-Laws of the Alumni Association, which reads as follows: "Section 8 Executive Committee. The Executive Committee, constituted as in Section 2 of this Article provided, shall possess and exercise the powers delegated them by the Directors and shall examine all bills presented for payment and cause bills approved by said Executive Committee to be endorsed by the President of the Association and paid by the Treasurer"

Be amended so as to read as follows: "Section 8. Executive Committee. The Executive Committee, constituted as in section 2 of this Article provided, shall possess and exercise the powers delegated them by the Directors and shall convene at the call of the President to advise and act on such matters of policy and procedure as may arise between regularly constituted Board meetings.

"The President and Secretary of the Association shall be Chairman and Secretary respectively of the Executive Committee. A majority of the Committee shall constitute a quorum. The Executive Committee shall be governed by these By-Laws and by resolutions adopted by the Directors."

It was further resolved that notice of this proposed amendment of the By-Laws be given to the membership by the Secretary, as provided in Article vi of the By-Laws governing amendments.

The budget for 1942-43 was approved as read and there being no other new business the meeting was then declared adjourned by President Hartzog at 4:10 p.m.

MINUTES OF THE SATURDAY MORNING ALUMNI ASSOCIATION MEETING

The annual meeting of the Alumni Association in the faculty room of the Alumni Memorial Building was called to order at 10:43 by President Herbert J. Hartzog, '04.

He Missed . . . Heap Home Comfort

Black coal cropped out on the hillsides. The Indian knew it was there . . . could see it . . . could have had modern "tepee comfort" had he known the superior heat-giving qualities of anthracite.

But the American Indian burned wood amid the abundance of Pennsylvania's Anthracite fields. It took the great spirit of pioneers to bring the comfort and convenience of Old Company's Anthracite within the reach of American homes.

The Panther Valley anthracite deposits lay undeveloped for years. The hardest of hard coal was given away for the hauling . . . until The Old Company's founders solved the problems of navigation over the shallow Lehigh River to bring coal, at low cost, to city markets.

Gradually, public prejudice against the untried fuel was

broken down. Now, after more than a century of growth, The Old Company looks back with thanks on the driving force of the men who built "worthless black stones" into the nation's most dependable fuel.

Modern Americans can be thankful, too, that Old Company's Anthracite is available today. It burns longer, to give you steady, even heat at lower cost.

LEHIGH NAVIGATION COAL COMPANY INCORPORATED

The Old Company

Main Office:
FIDELITY-PHILA. TRUST BLDG.
PHILADELPHIA, PA.

Minutes of the last meeting as published in the July, 1941, issue of the Lehigh Alumni Bulletin were approved as published and the secretary was instructed to take the roll from registration cards.

President Hartzog then called upon Dr. C. C. Williams, president of the University, for his annual message to the alumni.

Dr. Williams opened his remarks with a brief discussion of changes which had resulted in the University because of war conditions. In describing the accelerated program under which Lehigh is in operation for twelve months out of the year, Dr. Williams said that there were three objectives of particular importance: (1) to serve the national needs; (2) to preserve the careers and futures of the young men who have presented themselves to the counsels of the faculty by choosing Lehigh University as their Alma Mater; and (3) to conserve the educational vigour and integrity of Lehigh University.

"I think if there is any one thing that will help us win the peace," Dr. Williams said, "it will be the preservation of independent institutions of learning. I don't know of a bulwark more reliable than independent colleges."

Pointing out that education received in three years could not possibly be as satisfactory as that in four, Dr. Williams none the less emphasized the value of increasing the effective manpower of the nation, indicating that while the immediate results are not as good as those achieved under the regular program, in fifty years there will be little discernible difference between those educated in three years and those in four.

After outlining some of the details of the operation under the accelerated plan, Dr. Williams said that to set up a summer semester it is necessary to meet the expenditure practically as an addition to the current obligations. In spite of the fact that some of the faculty members have been lost to the armed forces and research and some savings were made possible by not using a full staff in the summer semester, there is still an appreciable addition to the budgetary burden. President Williams suggested that monies collected under the Lehigh Alumni Fund might well be expended to aid the University with this new financial load.

Under achievements of the year, Dr. Williams pointed out the work that is being conducted in combustion engineering and diesel engineering for classes of Navy men who receive sixteen-week courses here. He pointed out a number of other projects in explosives, organic chemistry, metallurgy and X-Ray where Lehigh has been complimented by having its professors chosen for important research jobs. The development of a new synthetic bristle for paint brushes by Dr. Harvey Neville, head of the department of chemistry, was cited as a particularly fine example by Dr. Williams. Turning to the problem of prospective students, the president said, "The number of applications for next year is about 10% fewer than last year at this time. Boys graduating from secondary schools," he said, "are more uncertain than they are during normal years as to their plans and as a consequence prospects for a large freshman class are less favorable."

In closing, Dr. Williams pointed out the possible uses of the Alumni Fund for the coming year. "I hope," he said, "that we might use it to meet the additional expenditure put on the University by running the

Bonds for Lehigh

Gordon Kent, treasurer of the class of 1907, has announced that at the 35th reunion of that class, held over the past alumni week-end, it was voted that \$750 should be taken from the class treasury to buy two \$500 series F war bonds to be registered in the name of Lehigh University.

Through this gesture the class has not only made possible a most welcome addition to Lehigh's investment holdings but has cooperated 100% with the Government's current emphasis on war bond sales.

summer semester which has been an additional burden on the budget. The Alumni Fund would practically cover that additional load. Another possible use is for the extension and modernization of the hydraulics laboratory. We have just gone through a disastrous flood in Bethlehem which has done a good deal of damage. We have a faculty now properly equipped to study methods of preventing the damage that a flood like that produces and the expenditure of \$25,000 would equip a modernized hydraulics laboratory to do this work."

Another possible project mentioned by Dr. Williams was the student appeal for more athletic areas near the campus. The latest student suggestion is that an area be levelled off on the top of South Mountain which would be relatively accessible to students.

On request from President Hartzog, Dr. Williams commented upon the question of adequate lighting in the library, admitting that the present fixtures have never been satisfactory. After analyzing the various problems which are involved in renovating the illumination of this building he estimated that perhaps \$5,000 would be necessary to modernize the lights.

At the conclusion of Dr. Williams' talk President Hartzog called on Mr. Okeson to report on the University financial picture and after congratulating the alumni office on its activities during the year, Mr. Okeson pointed out that the University will complete another year "in the black." He qualified this statement with the explanation that in the years to come the University is going to lose just as much as it can gain at the present time, so that any surpluses which may be achieved now will be badly needed for future readjustment.

Turning to the endowment field he explained that during the year we have had a moderate addition of some \$97,000 both in restricted and unrestricted gifts. He then paid tribute to one of Lehigh's most loyal and prominent alumni, the late Samuel Dexter Warriner, '90, who for the last thirty years was a member of the Board of Trustees and for the last twenty years chairman of the financial committee. Mr. Okeson ex-

plained that in his will Mr. Warriner had left \$50,000 as an outright gift to Lehigh University and in addition had created four trust funds for each of his children with the University named as residual legatee.

At this point Mr. Okeson explained the desirability of Lehigh men thinking seriously of residual bequests in the interests of the University, achieving both thorough protection for the family but at the same time thinking about the future of Lehigh. "We have to provide for Lehigh if we want her to continue to exist," he said.

Praising the work which has been done by the Council of Class Agents, headed by C. L. T. Edwards, '13, president, Mr. Okeson explained that contributions to the fund had come in excellently until Pearl Harbor and in spite of the decrease which followed, funds collected were considerably in excess of those of the past year.

Turning to individual contributions Mr. Okeson gave particular thanks to Mr. William L. Heim, '02, S. E. Berger, '89, E. F. Johnson, '07, and other alumni who had been particularly thoughtful in giving large gifts to Lehigh. "After twenty-five years," he said, "you just cannot help but love the place and every fellow in the place."

On request of Dr. Eugene G. Grace, '99, Mr. Okeson then explained how George W. Hoban, '15, had been named as head football coach.

On the conclusion of Mr. Okeson's words President Herbert Hartzog called upon Robert F. Herrick, executive secretary of the Alumni Association, for his report, this being the same as listed under the minutes of the Board meeting on a previous page.

The Active Membership Cup, annually awarded to that class which has shown the greatest percentage of active members, was received from Mr. Hartzog by Mr. Okeson in behalf of the class of '95.

Upon a motion by Samuel Berger, seconded by Morton Sultzer, reports of the standing committees were voted to be accepted en bloc and spread upon the records.

A vote of thanks was extended to alumnus trustees and officers of the Alumni Association for the "splendid work they have done this year" upon motion by H. D. Wilson, '01.

John I. Kirkpatrick, '29 was asked to read a list of those Lehigh men whose deaths were reported during the past year. At the conclusion of the reading, the Alumni stood in silent tribute while taps was blown. The names were as follows:

Robert Nelson Getty, '76; Walter Percival Rice, '76; Charles Rudolph Rauch, '77; Henry Heuttig, '78; Jenkins Thomas Reese, '80; Benjamin Franklin Haldeman, '81; Allen Ames, '83; Harrison Link Auchmuty, '85; Charles Alexander Junken, '86; Robert Henry Phillips, '87; Harry Wilbur, '87; Manuel Victor Domenech, '88; Albert George Rau, '88; William Pemberton Richards, '88; Edward Benjamin Wiseman, '88; Albert Daniel Oberly, '89; Theodore Alfred Straum, '90; Samuel Dexter Warriner, '90; Edward Haviland Cox, '91; Hermann Merlweather Knapp, '91; Robert Jacob Yost, '92; Charles Malcolm Douglas, '93; George Stern, '93; James Lindsey Burley, '94; Walter Jules Douglas, '94; Samuel William Briscoe, '95; Henry Milton Cressman, '95; Robert Selden Huse, '95; Sargent Van Lear Lippitt, '95; William Spencer Murray, '95; Lawrence Leander Borden, '96; Thomas Micks Clinton, '97; Patrick Edward Dinan, '97; Frederiek

How NOT to drag hose. Avoid pulling kinks in hose. Take time to LIFT and pull over rough places.

War on *Wear!* MANHATTAN'S Suggestions for the Care of RUBBER HOSE

You can make your rubber hose last longer if you follow these 12 Rules carefully. This is patriotism and efficiency.

1. Avoid sharp bends at fittings; also twists and kinks in body of hose.
2. Attach couplings carefully, forcing shank straight into hose, using soap and water lubricant.
3. Straighten hose before dragging and while unpacking. Do not forcefully bend, twist, kink, or pull hose.
4. Do not stop flow by kinking (see illustration); this ruptures fabric reinforcement.
5. Do not let hose lie in sun, hot or damp places.
6. When not in use, drain and roll up, but do not suspend on nail.
7. Do not permit heavy objects to run over hose.
8. Avoid excessive temperatures, violent fluctuations of pressure, unnecessary flexing, oil or grease.
9. Rotate large hose periodically to distribute wear and handle with ample supports to distribute strains.
10. Use the correct type and size hose for the conditions.
11. Store in dark, cool place.
12. Consult MANHATTAN Representative.

The qualities that result in long life have been a MANHATTAN objective for 50 years in the "engineering" of its rubber products for industry.

William Warr, '95
F. H. Williams, '39

A. J. Kutzleb, '13

How NOT to use hose. Do not shut off hose this way; it will speed breakdown, slow-up production.

Hutton Getman, '98; George Craig Leidy, '98; Benjamin DeWitt Riegel, '98; Robert Witmer Sterrett, '98; Andrew Thomas Brice, '00; Herbert Terry Greene, '00; Harry Ivins Magee, '00; Robert Montgomery Bird, '02; William Thomas Griffith, '02; Floyd William Parsons, '02; James Cadwalader Sellers, '02; Louis Withers Evans, '03; John Jones Carl, '04; Ralph Grant Johnson, '04; George Newton Lauer, '04; Thomas Benjamin Mickle, '05; George Milford Baker, '07; Rollin Landis Charles, '07; Malcolm Henry Ulman, '07; Calder Blain Bressler, '08; Howard James Jackson, '08; Robert Davis Taylor Dowling, '09; Charles Allen Foust, '10; Francis Carroll Gilligan, '10; Charles Aloysius Gosztonyi, '10; Lovell Lawrence, '10; Philip Horn Hoffman, '11; Ralph Penny Baird, '12; Ezra Almon Wheaton, '12; Daniel Kinsman Evans, '13; Roscoe Bartlett Dayton, '14; Alfred Olson, '14; Julius Frederick Harder, '15; Thomas Waddell Gangloff, '17; John Christopher Moench, '18; Franklin Bailly Speakman, '18; Thomas Joseph Bray, '19; William Sweet Eichelberger, '24; Morgan MacMorris Mann, '24; John Edward Hoffa, '25; James Harold Plummer, '28; Minoru Inaba, '29; Samuel Solomon Gidding, '30; William Henry Everett, '31; Josiah Harmar Penniman, '34; Charles Louis Unrath, '38; David Kemper, '41.

The following alumni have died in the service:

George Frederick Kennedy, '27; George Oliver Ellstrom, '38; Donald William Cooper, '39; John Bradley Rush, '40; Terry Schiff, '40; David Barnecott, '41.

E. R. Morgan, '03, gave the report of the tellers and announced that J. H. Pierce, '10, had been elected president of the Alumni Association for the 1942-43 fiscal year, with 563 votes. Other officers elected were Mercer B. Tate, '20, vice president; Donald R. Lowry, '11, vice president; Robert S. Taylor, '95, treasurer; Howard Eckfeldt, '95, archivist and Stewart J. Cort, '06, alumnus trustee.

Mr. Hartzog, in handing the gavel to Mr. James H. Pierce, the new president, said, "The college of arts and science now takes its place in the sun and rests on its laurels. For next year the burdens of the Association are again returned to the college of engineering. I wish them well and I now present to you the newly elected president of the Association."

In taking over his office Mr. Pierce said, in part, "Fellow alumni, I assure you that it is a great pleasure to have this confidence but I also point out sincerely that I accept knowing my responsibility to devote whatever time is necessary to carry on the work of the Association as it has been in the past. We are going through very critical times. At the same time, all of us are doing a lot to protect ourselves against the uncertainties of the future. When you come to think of it in the terms of the University the problem becomes even more complex. I think we should all be proud of a Board of Trustees of such outstanding calibre which has done a wonderful job with the funds at its command."

Mr. Pierce continued, "We have two objectives and these were very clearly demonstrated last evening when Mr. Glancy spoke about the urgent need of winning the war, while Dr. Landis pointed to the longer range objective whereby we must see this University through the war and be able to carry out the cultural objectives which it has had in the past."

After announcements concerning further activities of the day and, no further business being indicated, a vote for adjournment was passed at 12:18 p.m.

LIST OF DEGREES CONFERRED AT LEHIGH'S 74TH COMMENCEMENT

THE GRADUATE SCHOOL

Candidates were presented by
Dean Tomlinson Fort

PROFESSIONAL DEGREES

Electrical Engineer:

Walter Pennypacker Wills, (B.S. in E.E., M.S., Lehigh University), Philadelphia.

Industrial Engineer:

Philip Marx Zimmerman, (B.S. in I.E., Lehigh University), (M.S., New York University), Detroit, Mich.

Metallurgical Engineer:

George Henry Enzian II, (B.S. in Met. E., Lehigh University), Pittsburgh.

MASTER OF ARTS

Major in Education:

Robert Edgar Brong, (B.S., Muhlenberg College), Danielsville; Rachel Elizabeth Brown, (A.B., Wilson College), Allentown; LeRoy Krick Miller, (A.B., Franklin & Marshall College), Allentown; Chester Wimmer Sames, (B.S., Muhlenberg College), Bethlehem; Thomas William Watkins, (A.B., Dickinson College), Coopersburg.

Major in History:

Margaret Edwina Kostenbader, (B.S., Muhlenberg College), Wind Gap; Marian Esther Smith, (B.A., Moravian College for Women), Bethlehem.

Major in Mathematics:

Samuel Stoner Ensor, (B.A., Bridgewater College), Frederick, Md.

Major in Spanish:

William Beckler White, (B.S., B.A., Hampden-Sydney College), Waynesboro, Va.

MASTER OF SCIENCE

Major in Bacteriology:

Donald LeRoy Erdman, (B.S., Muhlenberg College), Allentown; William Joseph Kuhns, (B.S., Muhlenberg College), Allentown; Elmer Gould Smith, (B.A., Lehigh University), Bethlehem.

Major in Chemistry:

William Adrian Blum, Jr., (B.S. in Ch.E., (Lehigh University), Bethlehem; William Keddle Meerbott, (B.S. in Chem., St. Peter's College), Jersey City, N. J.; Herbert E. Rasmussen, (B.S. in Ch.E., Lehigh University), Freehold, N. J.; Lowrie Barnett Sargent, Jr., (B.S., Washington & Jefferson College), Fredericktown; Ervin Richard Spitzmiller, (B.S., University of Denver), Grand Lake, Colo.

Major in Civil Engineering:

Roger Edward Kolm, (B.S. in C.E., University of Washington), Seattle, Wash.

Major in Electrical Engineering:

Maurice Leighton Greenough, (B.S. in E.E., Tufts College), Groveland, Mass.; Gerald Gordon Murphy, (B.S., Montana State College), Powell, Wyo.

Major in Geology:

Edwin Augustus Brown, (B.A., Lehigh University), Bethlehem; Carl Andrew Warmkessel, (B.A., Lehigh University), Fogelsville.

Major in Industrial Engineering:

Allen Herbert Zane, Jr., (B.S. in I.E., Lehigh University), Long Island City, N. Y.

Major in Mechanical Engineering:

Webster Charles Roberts, (B.S. in M.E., Case School of Applied Science), Cleveland Heights, O.

Major in Metallurgical Engineering:

Robert Joseph Schler, (B.S. in Met.E., Purdue University), Milwaukee, Wis.

Major in Physics:

Albert David Simpson, (B.S., Muhlenberg College), Allentown.

Bachelor of Arts:

Stephen Francis Balshl, Bethlehem; Kenneth Caswell Bauder, Lansdowne; Jesse Franklin Beers, Jr., Mahwah, N. J.; George Beverly Benedict, Albany, N. Y.; William Milton Benesch, Baltimore, Md.; Richard Joseph Berg, New Rochelle, N. Y.; Welles Royce Bliss, Glen Ridge, N. J.; Philip Guernsey Butts, Bethlehem; Carl Creldenberg, Washington, D. C.; John Lake Diamond, Bethlehem; Clement Roger Ferland, Middlebury,

Vt.; Charles William Freed, Jr., Quakertown; George Richard Lawrence Gaughran, Allentown; Walter William Gleadall, Jackson Heights, N. Y.; Robert Edward Goodman, New Rochelle, N. Y.; William Deane Gorman, Swarthmore; Arnold Herbert Edward Grandage, Bethlehem; Frank Joseph Cress, Bethlehem; Dale Ackley Harris, Trenton, N. J.; James Henry Kidder, Philadelphia; Edwin Howard Klein, Paulsboro, N. J.; Eugene Leonard Kline, Trenton, N. J.; Russell Francis Klinger, Louisville, O.; Conrad E. Kluger, Paterson, N. J.; Carl George Konolige, Bethlehem; Monroe Levy, Trenton; N. J.; George Alexander Logan, Maplewood, N. J.; Stephen Brooks Longley, Maplewood, N. J.; Robert Merrill Lynch, Greenwich, Conn.; John Joseph Matzko, Saint Clair; Franklin Bliss Mayer, Erie; William Jackson Meikle, Harrisburg; Tom Charles Mekeel, York; Robert Alexander Nicosini, Bayside, N. Y.; Clarence Marcellus Sanderson, Jr., South Orange, N. J.; Joseph Doty Scott, Milburn, N. J.; Grendon Kenneth Sebold, Elizabeth, N. J.; Raymond Sentman Willard, Jr., Coatesville; Richard John Yurkanin, Bethlehem.

Bachelor of Science in Engineering Physics:

Alfred Bruce Brown, Essex Fells, N. J.; Frank Harvey Ferguson, Philadelphia; Robert Mercier Maiden, Trenton, N. J.; John Thompson Ransom II, Haddonfield, N. J.; Theodore Hosmer Redman, Louisville, Ky.; Joseph Benson Reynolds, Jr., Bethlehem; Rudolf William Samer, Elizabeth, N. J.; Louis Everett Sharpe, Larchmont, N. Y.; Albert Leo Thalhamer, Clifton, N. J.; Kurt Heinz Weber, Tenafly, N. J.; Lee Robert White, Middletown.

Bachelor of Science in Industrial Engineering:

Robert William Beck, Jr., Johnstown; Robert McCleary Bowman, Wyncote; Richard Rieser Bright, St. Davids, John I. Brower, Plainfield, N. J.; Irwin Russell Burkey, Hamburg; Nelson Raymond Clark, Jr., LaGrange, Ill.; Robert Wesley Clark, Lakewood, N. Y.; Allison Walter Clokey, Rutherford, N. J.; Fenton Rulon Cloud, Norristown; Charles Parker Davidson III, Clarks Summit; Charles Bockoven Dutton, Morristown, N. J.; Edward Gordon Evans, Scranton; Robert Henry Forsyth, Red Bank, N. J.; Russell Charles Gerecht, Jr.; Elkins Park; Gregory Gould, North Tarrytown, N. Y.; Jerry Charles Hubeny, Elizabeth, N. J.; David Lindsay Hume, Tulsa, Okla.; Harry Witmer Jones, Jr., St. Davids, John Emmett Lane, Mt. Lebanon; William Bennett Logan, Bethlehem; Charles Tweeddale Loveless, Warreu, O.; Paul William Marshall, Pottstown; Robert Henry Marshall, Kennett Square; Leonard Hamner Miller, East Orange, N. J.; Cyril Anthony Neyhart, Allentown; David Kierstead Nichols, Nutley, N. J.; Clyde Charles Ruffle, Queens Village, N. Y.; Charles Henry Schumacher, Jackson Heights, N. Y.; Jacques Segal II, Flushing, N. Y.; Jesse Tavenor Smith, Shaker Heights, O.; John Stoddell Stokes, Jr., Huntingdon Valley, Edward James Stone, Olean, N. Y.; Gordon Edward Tait, Wood-Ridge, N. J.; Frank Raymond Thaeher, Manhasset, N. Y.; Lindsay Dodd Van der Veer, Somerville, N. J.; Alexander King Wiggins, East Orange, N. J.; Alfred Lewis Zanoni, Raritan, N. J.

Bachelor of Science in Mechanical Engineering:

Raymond Burr Anderson, Jr., Buffalo, N. Y.; Boris Baiko, Commack, N. Y.; Robert Allan Bennett, Northampton; Edward Fulper Bodine, Fairfield, Conn.; Alexander Brkich, Bridgeport, Conn.; Frank Taylor Brundage, Jr., Norwalk, Conn.; Robert Elmer Chamberlain, Lyndhurst, N. J.; Richard Henry Cliff, Jr., South Temple; Edward John Coffey, Jr., Bethlehem; John Herren Dudley, McKeesport; Thomas Fleischer, Indianapolis, Ind.; Robert Edwin Gengenbach, Bristol, Conn.; William Evans Gheen, Jersey Shore; Walter Owen Graham, Jr., Upper Montclair, N. J.; Michael Guidon III, Freemansburg; John Balmain Hill, Jr., Hamburg, N. Y.; Caleb William Holyoke, Milwaukee, Wis.; John Arthur Kimberley, Dalton, Mass.; Philip Lutters, Derby, Conn.; Malcolm Findley McConnell, Jr., Pittsburgh; Robert Bruce Miller, Bethlehem; Frederic Stuart Nolte, Riverside, Ill.; Charles Anthony Patton, Allentown; James F. Pfeffer, Jr., Upper Darby; John Arnold Reid, Montclair, N. J.; Sumner Willard Reid, Wyomissing Hills; Howard Oscar Schroeder, Bloomfield, N. J.; Murl Wolfe Sears, Woodlawn, Md.; William James Skinner, Madison, N. J.; Leslie Orman Southgate, Jr., Jamesburg, N. J.; Eugene Roy Springer, Houston, Tex.; Robert Samuel Struble, Ben Avon; Robert Gorman Taylor, North Hills; John Davis Van Blarcom, Aliquippa; Earl Lewis Weaver, Jr., Allentown; James William Witherspoon, Jr., Tuckahoe, N. Y.; Robert Rochester Young, Philadelphia; Whitney James Young, Bethlehem.

Bachelor of Science in Metallurgical Engineering:

Jesse Oatman Betterton, Jr., Santa Ana, Cal.; William Filson Boore, Jr., Teaneck, N. J.; William Lawrence Clark, Mountain Lakes, N. J.; Harold Alexander Grubb, North Hills;

Donald Henry Kleppinger, Bethlehem; William Thomas Mainwaring, Pittsburgh; Frank Shirley McKenna, Crafton; Robert Charles McMichael, Chester; Richard Edward Metius, Merion; Albert Marshall Miller, St. Petersburg, Fla.; John Hugh Norwood, Hamburg, N. Y.; John Louis Peterson, Wood-Ridge, N. J.; Charles Henry Savage, Morristown, N. J.; Theodore Gourdin Scott, Jr., Orange, Va.; Eugene Monroe Smith, Philadelphia; Emerson Daniel Spengler, Northampton; Robert Breckinbridge Steele, Jr., Great Neck, N. Y.; Frederick Carl Tillberg, Philadelphia.

Bachelor of Science in Mining Engineering:

Richard Henry Brenneman, Pottsville; Donald Clinton Howe, Allentown; Florent Joseph Tokarczyk, Coaldale; Powell Joseph Whalen, (B.S. in C.E., University of Vermont), Burlington, Vt.

COMMISSIONS AS SECOND LIEUTENANTS IN THE OFFICERS' RESERVE CORPS

GRADUATE STUDENTS

D. N. Bachman, Allentown; C. D. Bartlett, Jr., Bangor, Me.; R. Bowu, Jr., Maplewood, N. J.; C. B. Dutton, Morristown, N. J.; R. H. Forsyth, Red Bank, N. J.; W. E. Gheen, Jersey Shore; R. N. Gusdorff, Hasbrouck Heights, N. J.; J. P. Larkin III, Jersey City, N. J.; W. B. Logan, Bethlehem; Malcolm Findley McConnell, Jr., Pittsburgh; R. T. Meckbach, Bogota, N. J.; R. F. Moss, Jr., Merion; R. D. Munnikhuyens, Bel Air, Md.; R. M. Palmer, Reading; J. A. Read, Montclair, N. J.; H. T. Reuwer, Harrisburg; P. W. Saitta, Jr., Lebanon; J. Schneider III, Cambridge, Md.; A. D. Tift, Wynnewood, L. D. Vander Veer, Somerville, N. J.

Chemical Warfare Service:

W. T. Bostock, Jr., Roselle Park, N. J.; L. S. Hollander, Maplewood, N. J.; D. C. Osborn, Shaker Heights, O.; W. G. Willmann, Bethlehem.

Engineering Corps:

J. M. Adams, Allentown; R. E. Ashley, Muskegon, Mich.; W. H. Lindsay, Jr., Haddonfield, N. J.

Infantry:

W. L. Clark, Newtonville, Mass.; H. C. Farrand, Jr., Bloomfield, N. J.; E. H. Klein, Paulsboro, N. J.; S. B. Longley, Maplewood, N. J.; F. B. Mayer, Erie; H. A. Seebald, Allentown; W. M. Spears, Jr., Cleveland O.; F. R. Thaeher, Manhasset, N. Y.; A. L. Zanoni, Raritan, N. J.

Ordance:

H. L. Abbott, Fairmont, W. Va.; J. A. Arnold, Meadville; E. F. Bodine, Fairfield, Conn.; R. R. Bright, St. Davids; A. Clark, Jr., Nanticoke; R. W. Clark, Lakewood, N. Y.; H. V. Donohoe, Drexel Hill; J. H. Dudley, McKeesport; E. Gamble, Jr., Langhorne; W. A. Himmelwright, Bethlehem; D. L. Hume, Tulsa, O.; H. W. Jones, Jr., St. Davids; E. D. Latimer, Jr., Scranton; R. S. Macy, Kensington, Md.; W. T. Mainwaring, Pittsburgh; R. J. McGregor, Dunmore; G. E. Parsons, Jr., Marion, Md.; J. A. Quincy, Briarcliff, N. Y.; C. H. Schumacher, Jackson Heights, N. Y.; T. G. Scott, Jr., Orange, Va.; F. E. Smith, Jr., Clifton, N. J.; R. B. Steele, Jr., Great Neck, N. Y.; R. G. Taylor, North Hills; J. D. Van Blarcom, Aliquippa.

Quartermasters Corps:

C. C. Ruffle, Queens Village, N. Y.; A. W. Foster, Philadelphia; J. H. Millbank, Bloomfield, N. J.

Signal Corps:

A. B. Brown, Essex Fells, N. J.; E. F. Warner, Short Hills, N. J.

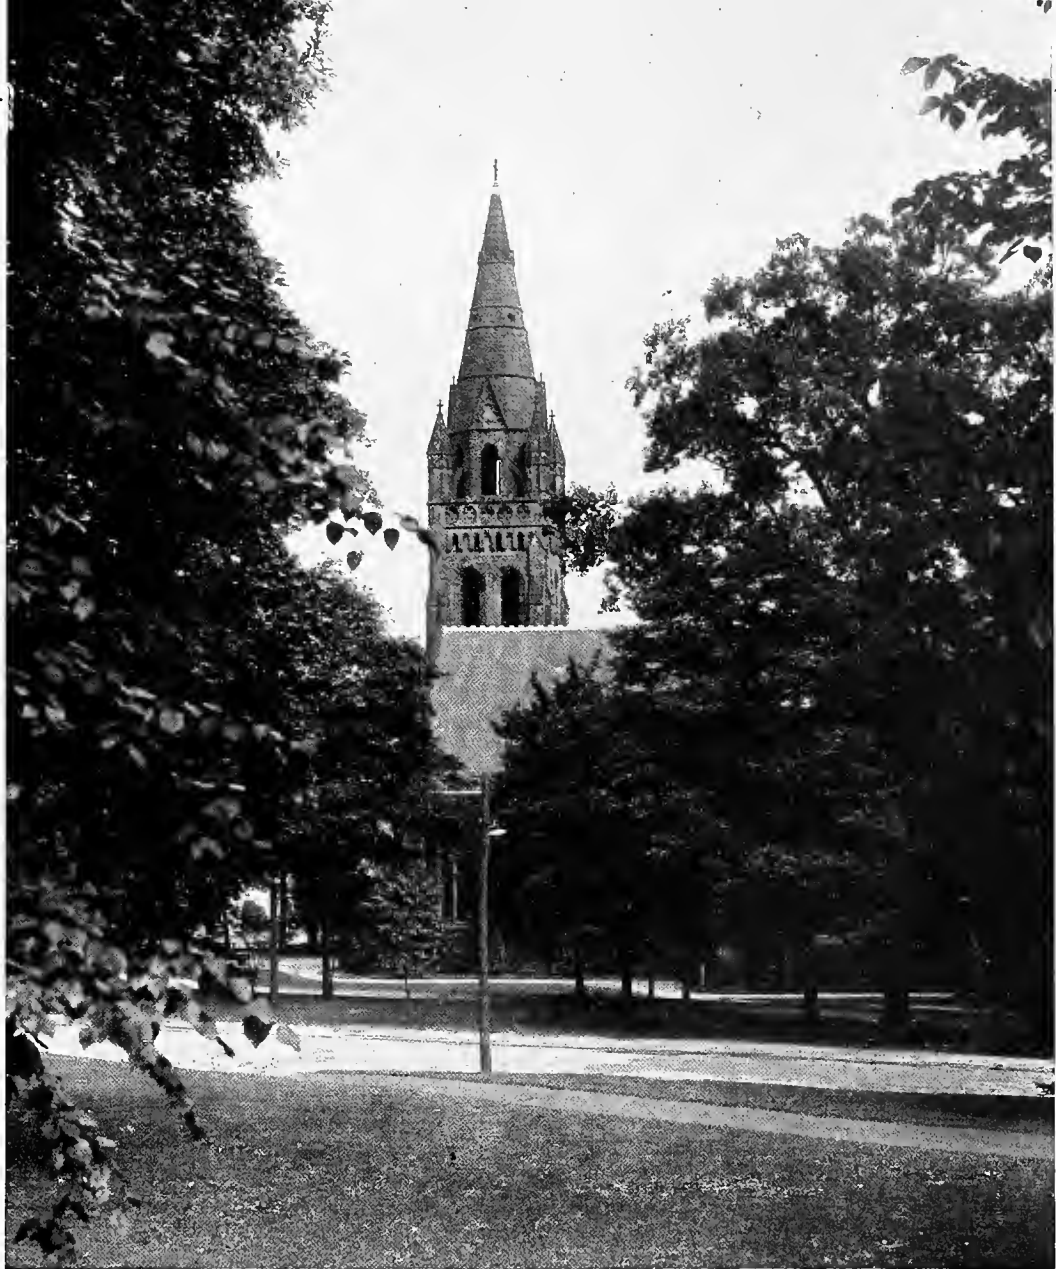

UNDERGRADUATES

Air Corps:

A. H. Rich, Buffalo, N. Y.

Infantry:

J. F. Belcher, Mount Vernon, N. Y.; A. H. Conklin, Upper Montclair, N. J.; K. Gordon, Jr., Bronxville, N. Y.; R. J. Lyons, Steubenville, O.; R. Maseuch, South Orange, N. J.; E. I. Shuttleworth, Philadelphia; J. P. Stajp, Clayton, Mo.

Packer Memorial Chapel

LEHIGH UNIVERSITY

is in continual session with three semesters of sixteen weeks each. The summer semester is divided into two eight-week terms. Freshmen may enter at the beginning of any semester or term.

THE ACCELERATED PROGRAM

which is optional, accomplishes all of the work of the four-year courses in two and two-thirds years. It provides students with as much college training as possible prior to the age of military service and it contributes more rapidly to the effective man power of the nation.

THE GENERAL COLLEGE DIVISION

is designed to meet the particular needs of individual students who are not candidates for a degree. Without reference to distribution or curriculum requirements, this program is based on individual capacities and interests.

For information address: Director of Admissions, Lehigh University, Bethlehem, Pa.

FOLLOWING THE *Lives* OF LEHIGH MEN

50 YEAR PLUS CLUB Walton Forstall, Secretary Rosemont, Pa.

The third annual gathering of the Club was so pleasant that all who came want to meet next year. At the Alumni Banquet on Friday night, seventeen 50+ badges shared the honor table with '92 and enjoyed a meal where the speeches were a happy mingling of fun and seriousness. On Saturday, the 50+ were in evidence at Alumni meeting and lunch, and twelve of them led the parade. Later a photograph was taken on the Class of '89 steps. In the evening, seventeen sat down in the Bethlehem Home Club and for four hours heard written greetings from unfortunate absentees, and indulged in happy banter and anecdotes of classroom and athletic field in those golden Eighties.

The Secretary was requested to send a greeting to the oldest living son of Lehigh, McMullen '70, and the President asked to congratulate Buck, '87, unavoidably absent Saturday, on the flourishing condition of his brain child.

The office of President belongs to the Class, fifty-one years out, and Walton Forstall was elected for a year. W. A. Cornelius became secretary, on the basis of permanency and Bethlehem residence.

The fortunate members there for one or both meals were Pettee, '77; Forstall, Dairymple, '83; Jones, '85; Grossart, '86; Buck, Smith, '87; Phillips, '88; Berger, J. C. and W. A. Cornelius, Johnston, '89; Foering, Neumeyer, Schnabel, Spengler, Turner, '90; Forstall, Miller, '91.

The Club welcomes '92 to the charmed circle.

CLASS OF 1889

Billy Cornelius
"Pinch Hitter" for George W. Harris,
Correspondent

Harris has asked me to "pinch hit" for him this month—not under the definition of a "pinchhitter," (one pnt in to do a better job than the regular man) for no one could do a better job than Harris has been doing, and we all owe him a vote of thanks for his monthly write-ups under our classnotes.

Arch Johnston celebrated his 78-years-young birthday May 30, receiving congratulations from all around and a fine write-up in the Bethlehem paper telling of the wonderful things he started during his term as mayor for making Bethlehem a better place in which to live. Arch says the reporter always comes out to see him a few days before his birthday and asks him, "How old are you, Mr. Johnston?" and he always gives his age at the present time and doesn't say anything about his being a year older in a few days, so the newspapers called it his 77th birthday. Anyway, 77 or 78, he is the same Arch.

Lambert writes from Pasadena, telling of seeing Mrs. Moffett quite often, who asks about the '89ers. Also seeing Clattie Walker and his daughter Eleanor every week or two and all goes well with them. "Had a surprise visit from Mrs. Artie Long," Lambert says, "as radiant as a young girl."

Letter from Chapman telling of changing his address to 700 Riverside Drive, New York City. Pleased with his new location as he can walk across the street into the park and enjoy the sunshine.

Walton Forstall, '91, secretary of the Fifty-

Year-Plus Club, is writing up the account of its doings, and you will find it in another column. Every '89er who can should get back to attend this Club's affairs. They are well worth while.

Diebitsch expected to be up to the dinner Saturday night but evidently at the last moment could not make it. I am secretary of the Club this coming academic year and will try to keep you informed of activities and perhaps we will not wait till June '43 before we have a get-together.

Here's to looking forward to Harris' notes in the next issue and best of luck to you all from Mrs. Cornelius and me.

CLASS OF 1892

H. H. Davis, Correspondent
132 Liberty St., Newtown, Pa.

50th REUNION

It was certainly beautiful weather we had for our celebration on the 5th and 6th of June.

I had agreed to meet Bob Kitchel on the train to Bethlehem which I did, and as we were approaching the station Brady and Gjertsen came into our car.

The four of us went direct to the Hotel Bethlehem and found that Charlie Wood and his brother Herbert of the class of '99 had arrived.

We were sorry that the president of our class, C. M. Case, was not able to be with us, as well as his brother G. P. Case.

Those of our class who attended some of the functions were R. L. Baird, J. M. Beaumont and R. R. Kitchel and those who attended our banquet were W. Y. Brady, H. H. Davis, T. Gjertsen, J. B. Semple, P. H. W. Smith and C. O. Wood, and as guests I. I. Beinhower of '94 and G. Herbert Wood of '99.

Those who attended the Alumni Banquet on the 5th and those who attended the Alumni Luncheon given by the University on the 6th, thoroughly enjoyed the good speakers.

I am sure we all felt well repaid for the effort necessary for us to get together on this particular occasion.

According to our records there were 26 living members of our class and there were 9 who came back making a percentage of 34%.

There were seven of us in the parade and had the usual picture taken at the foot of the Flag Pole.

Some of us had not seen the new building contributed by Eugene G. Grace and were deeply impressed by the completeness of the building which has access on the first and third floors from drives.

CLASS OF 1897

J. H. Pennington, Correspondent
P. O. Box 159, Trenton, N. J.

45th REUNION

You are a fine bunch. You pass up the greatest opportunity for the time of your life that has come your way in forty-five years. I would not dare to say what the perspiring faithful, all four of them, told me to tell you. The BULLETIN Goddess would not even read it. It would have burned to ashes before being mailed.

From the above, you may imagine faintly how we felt as we five sat and dumbly looked at one another, wondering why the end of the world had come so suddenly, Shame! The five intellectuals, whose consciences are clear, are Baldwin, Digby Bell, Tommy Clagett, Pennington and Teece Yates. Tommy came all the way from Bluefields and Baldwin all the way from Rutland. These two examples of virtue and integrity were sorely disappointed when they found only your correspondent on hand, and he was asleep when they came bursting into his room like the cutups they have always been.

Well, it was a grand time any way you look at it. The flag which we bought in 1927 was found after being lost for fifteen years, and was proudly carried in the parade with the same lightness and agility as we did the same job fifteen years ago. The parade started off on the down grade, over the same route which we followed nearly fifty years ago on the way to the athletic field from the old Gym. That was fine, as it gave the gallant '97 boys the impetus to at least reach the bottom of the hill. When we got that far we had to turn and march up cannon-ball alley, a grade of one one-hundredth of one percent. This was too much. The crowd, again all four of them, began to stagger blindly (from exhaustion) and continually called to the standard bearer to not walk so fast. We were merciless, however, and finished the march in a blaze of glory, though we admit

THE FLAG POLE WAS A MEETING PLACE FOR MANY OLDER GRADS

some difficulty in mounting the three steps at the flag pole, and also admit the loss of four pounds in weight getting down to two hundred once more.

The remainder of the time was easy. The dinners on Friday and Saturday nights were polished off in style, and by Sunday morning we had recovered the four pounds.

The four musketeers, Baldwin, Bell, Claggett and Yates were as delightful as ever. In appearance they had not aged a particle during the last two months. We wish that we could print the charming story told by Teece Yates at the class dinner, about Tommy Clinton, our Colonel, but here the proprieties step in. Claggett left at 4 p.m. Saturday after all the trouble he took to be there. But he did stay long enough to have his picture taken with the rest of us. I am told that the issue of the BULLETIN in which this photo will appear, will be doubled in price. This is to reimburse the photographer for the damage to his camera.

Well, it was a grand time. The quiet talks of times long past. The stories we related of our wild oats days, anecdotes concerning our Faculty, the beautiful growth of the University, the war, the New Deal, and the grand Old Deal—all formed a beautiful setting for the mental pictures we separately and collectively painted of the forever gone forty-fifth.

40th REUNION

We again won the attendance cup. I haven't found out just what the percentage of the attendance was or official count, but we get our numerals on the cup for the second time. The other time was in 1917, twenty-five years ago. One of the fellows remarked that it took the war to give us the chance to win.

Our fortieth reunion is over, and those of us who were fortunate enough to be able to attend have something to talk about, and those of you who were not present have missed something. The following men were back, either for the full time or for part time: Messrs. Diefenderfer, Eichner, Fryer, Geiser, Hall, Helm, Johns, Landis, Lines, Sachs, Shonk, and Thomas.

Friday evening we were fortunate enough to be able to sit at one table, that is, all except Landis, who was to give one of the principal addresses and he pulled up to the speakers' table. He joined us later at the Bethlehem Club and we sat there hashing and rehashing experiences until an hour which was much too late for some of the old men.

Saturday we had our pictures taken and then discovered we had been awarded the cup so had it taken again to show you fellows who were not here that we had actually won the cup. If anybody missed the luncheon, I did not hear of it. But then I was rather busy myself, as most of you will remember I am when there is anything to eat. Landis, of course, deserted us again and had his luncheon with the higher-ups—the trustees. Twelve of us appeared at the banquet and after partaking of those things which help the body, we heard a very good and interesting resume of the members of the class and, where possible, what had become of them since 1902. Later we went into an executive session, or bull session, and definitely settled many things including how long the war would last and who would win the same for us. After carrying this on for some time, and learning many things about one another, we adjourned at what seemed to be a very reasonable hour and got ready to keep ourselves in shape to attend our forty-fifth reunion.

Impressions: Thomas thinks he is ready to be classed among the class as an old man, but he put many in the shade when it came to getting around. Of course he can still talk.

Johns and Shonk were in a disagreement in regard to the contribution to the ALUMNI BULLETIN. Shonk being under the impression that he could contribute very little in the class news, unless some one took a little time to give him some news to publish.

Landis' youngest son is a senior at Lehigh.

Gross and Price have been found after having been lost for some years, but neither of them could attend the reunion.

BETHLEHEM

"WEDGE" ROASTERS

—have found a highly useful place in many process pictures, turning hitherto worthless residues into profitable by-products.

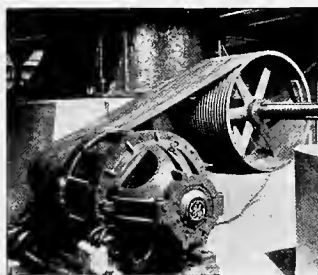

For instance, the Bethlehem Roaster shown at the left (photographed during erection) amortized itself in ten months on the job.

Gordon Kent, Guest Correspondent
728 N. James St., Rome, N. Y.

35th REUNION

The 1907 clan began to arrive Friday afternoon, joining Paul Mackall and the rest of the boys who live in Bethlehem. At least twenty-five or thirty had been expected, and Friday telegrams and letters arrived expressing regrets from several who, at the last minute, were unable to come as they had planned. Among these, much to the regret of those there, was "Doc" Carlock, our President. Coxey Johnson was one of these, too, on account of illness.

All who were there Friday afternoon went to the Alumni Banquet, to find that there was no table; however, with Paul Mackall's influence, a table was set up and we found ourselves next to the half-century men and those of more than fifty years, although we had three more five year reunions to go. After the banquet, many went to the Bethlehem Club, and did not report when they stopped reminiscing.

The next day we attended the luncheon given by the President and the Faculty, at which several more showed up who were not around the day before. Each had a large 35th Reunion lapel badge.

After the luncheon we had our picture taken at the Library steps, and then joined the parade. We notice now that each reunion gives us a big jump toward the head of the line, and looking back, see where we used to be. Only yesterday, as it were, it was a long way up to the head of the line, but not so any more.

After the parade, we became, for the remainder of the afternoon, the guests of Paul Mackall, who had arranged for a school bus to take us out to his place in Saucon Valley. This was door-to-door delivery. We had a very delightful time at his estate. Everything you could

wish for was there, and everyone was sober. The weather was perfect.

In the evening, our class dinner was held in the Fountain Room at the Bethlehem Hotel, where we learned much about how baseball used to be played, and how long the war would last. Al Hesse, pitcher, and Paul Mackall, catcher, told us they were not star ball players, yet we know the games were put in the bag for Lehigh. Good old teamwork got results. Lew Thomas presided and Gordon Kent, treasurer, reported there was money in our Treasury, which was a surprise to most of us. It was voted to buy the University two \$500 face value War Bonds.

Standing respect was paid those who passed beyond, of whom there were three during the year. Baker, Charles, and Ullman.

These men returned: Daniels, Gross, Jacobosky, Hesse, Horne, Hulse, Kennedy, Keot, Loose, Mackall, Porter, Reynolds, Schmid, Schweitzer, Shaffer, Thomas, Lew; Thomas, W. A., Wheeler.

Letters and messages of regret were received from Carlock, Freedman, Swope, Travis, and Walters.

Mrs. Lew Thomas, Mrs. Walter Thomas, and Mrs. Reynolds were the ladies who favored us by coming.

A big turnout is wanted and expected for our fortieth, and arrangements were made to that end.

25th REUNION

Well, boys, the 25th is now a matter of history.

We had a fine time, the few of us who were back. Personally, I wouldn't have missed it.

To begin with, there were Breen and Dawson. There, we had Achorn, Barkley, Beck, Buxton, Carmichael, Carter, Jacobson, Jenness, Kammerer, Knoss, Lehr, Portz, McCann, McKinley, Nichols, Porter, and Youry.

And then, we had Breen and Dawson.

Those two birds took up at the exact point at which they left off in 1937. As usual, Breen stole the show and kept most of us in a semi-hysterical state for two days. Those who were not semi-hysterical were semi-conscious.

It was a swell show and too bad that it lasted only a short time.

From Toronto came a telegram from Dick Williams expressing his regret that he would not be able to be present but he extended best wishes to all.

Freddie Portz ran the reunion for us and he did an excellent job. Breen tried to audit the books after dinner at the Traylor in Allentown on Saturday night and finally arrived at a figure of a refund of \$5.20 per capita or he was going to have Freddie arrested.

Freddie says that this is the last show he will ever run and I believe that he means it. We all thank him for having done an outstanding job.

About the only serious business that was transacted was to elect Breen as Class Agent. He will do a good job but will require your support and mine to be successful.

We had a lot of visitors to our rooms in the Hotel Bethlehem, "Doc" Landis, '02, who came in to see what gang kept him awake in his room (next door) on Friday night, "Sunnie" Edwards, '13, Chief of the Class Agents, "Eh" Caraway of the Athletic Department, Dannie Whiteman, '15 and a lot I don't remember, but who were welcome, despite the abuse they took. "Whitey" Lewis, '19 was among our guests. I was glad to see him.

For my part, I would like to reunion every year. It was swell to see that gang again.

When I got back home, there was a letter from Lieut. Comm. J. A. Carlson from Bermuda saying how sorry he was that he was unable to be present; that he had expected to be there but couldn't make the grade. Thank you, Art. We'll save your letter until Fall.

I am sorry to hear that Austie Tate is no better. Join me in writing to the "big guy".

CLASS OF 1921

LeRoy F. Christman, Correspondent
101 Endlich Ave., Mt. Penn. Reading, Pa.

"Buck" Walmsley, sometimes also known as Haines P. Walmsley says he has a "soft job, no worries, no work, and practically no pay" as General Branch Manager of the Monsanto Chemical Co. located in 827 Fisher Building, Detroit, Michigan.

Buck spent two years at Colorado School of Mines after leaving Lehigh, was connected with the Swann Chemical Co. in operating end from 1921-1927 then in Sales successively in Philadelphia, New York, North Carolina and Cleveland. In 1935 he became Branch Manager for Monsanto Chemical in Cleveland and since 1938 in Detroit.

He is "full up and fed up with priorities" but very busy on ordnance work as well as pharmaceuticals and food products, also plants built and operated for the government to produce new materials.

"Buck" was married in 1922 to Virginia Des Jardinis, Denver, Colorado, has a daughter Harriet, now attending DePauw University which he says puts the shoe on the other foot as he now has to answer the requests for money. There is also a son Haines P. Jr., born in 1929.

"Bucks" favorite sports are golf and hoisting schooners. His home is at 210 Waddington Road, Birmingham, Michigan, 18 miles out of Detroit, where he wants any of the visiting firemen to call him when in town, and not wait as "Hughie" Hughart did after spending four

days in Detroit, then called him from Cleveland.

Harry V. Landis, on request reports as follows concerning his activities since leaving Lehigh in 1917. Went to Swarthmore in 1918, in S. A. T. C. at Franklin & Marshall until Armistice then back to Swarthmore in 1919. Joined flying squadron at Armstrong Cork Co. for a year then entered wholesale tobacco business with his father until 1922 when he opened his own business as Landis Electric Co., 121 North Duke St., Lancaster, Pa., where he is today as electrical contractor and appliance distributor.

Harry was married to Esther D. Mumma in 1920 and they now have four children. Kathryn, 20, in Armstrong Cork Co. accounting department, Richard and Robert (twins) 18, and Harry III, 12 in school.

He is much interested in tennis, having been Lancaster County champion in 1925, 1928, 1929, 1930 and Lancaster Country Club champion in 1925, 1928, 1929, 1930 and 1940, also Captain and Manager of the Country Club team for many years. Good luck, Harry.

"Hank" Boynton, full name Henry G. has been located in the Aviation Dept., of the Electric Auto Lite Co., Moto Meter Gauge and Equipment Division of LeCross, Wisconsin working out of their New York office in the Chrysler Building.

George F. A. Stutz, Correspondent
422 Edgemont Avenue, Palmerton, Pa.

20th REUNION

In spite of gas rationing and all the other obstacles of today, '22s' Twentieth Reunion was a dandy. There were 37 in the parade that formed in front of Packer Hall with a snappy drum and bugle corps of youngsters in the lead. Blue crew hats with white '22 numerals and white sweaters with brown '22 Lehigh insignia, together with the drum corps made a fine enough appearance so that '22 was awarded the flag for the best-appearing unit in the reunion parade. Since it is the first award we have ever won as an alumni group, it was a cause for real celebration. Ralph Potts

took a picture of it that I hope to publish in our next letter.

The roll call showed the following to be present: R. D. Allen, R. J. Beech, W. Brewer, G. M. Brumbaugh, H. Carroll, C. A. Connell, C. Craig, N. D. Davis, G. N. Ewing, J. A. Gerlach, D. Green, A. A. Gross, F. M. Huffman, R. D. Hughes, C. Ide, L. B. Kehler, J. K. Killmer, C. L. Knoderer, P. R. Larkin, W. H. Lutz, J. M. Newlin, R. H. Potts, R. R. Rhoad, L. C. Ricketts, S. P. Rodgers, A. L. Saltzman, B. E. Schaefer, W. Schler, E. D. Schwartz, W. L. Shearer, C. F. Silsby, C. C. Strauch, G. F. A. Stutz, H. D. Wallace, L. C. Whitney, R. T. Wood, R. C. Zantzing.

We had a fine get-together Friday evening at Class Headquarters in Room 832 at Hotel Bethlehem. Red Strauch and Jack Killmer had handled the arrangements in great style and with the proper refreshments, we were all set for the general dinner at 7:00 o'clock Friday. The dinner and talks were exceptionally good.

Saturday was a fine day and we breezed through the alumni meeting, luncheon and finally the parade. Incidentally all the other classes claimed that the drum majorette was responsible for our winning the parade flag.

The highlight, of course, was the class banquet on Saturday night at the Bethlehem Club. Skipper Eckfeldt and Jack Kirkpatrick were the speakers and they did an excellent job. Red Strauch was reelected President and Jack Killmer Vice President, with Bob Rhoad, Treasurer. I was given the job of Class Correspondent which accounts for this letter. I hope to give you some more details on the banquet in our next letter, together with some notes on the boys who were there.

I must report that there were a lot of fellows who wanted to come but could not. Ted Switz and L. N. Van Nort signed up but did not appear. Jack Killmer received notes of regret from the following:

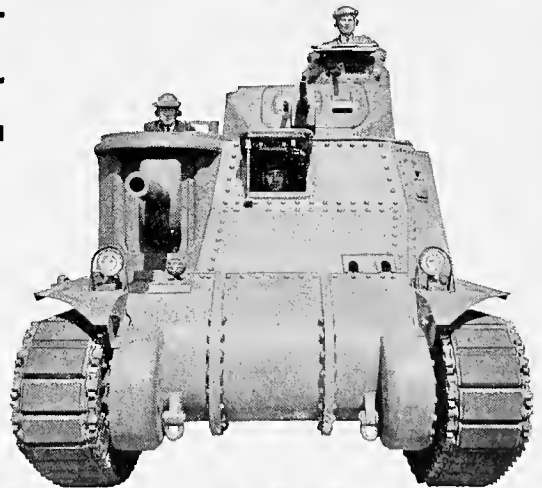

R. L. Culler, K. M. Downes, A. S. Thaeler (Too busy, too many ships to build), M. O. Jefferson, J. E. M. Wilson, F. W. Glasmire, G. D. Davis, C. P. Salmon, W. H. Waltz, J. L. Boltz, P. E. Bowman, C. H. Greenall (Now a major at Frankford Arsenal), Fielder Israel,

The Guardianship of HEALTH

The vigor, stamina, health and sanitary standards of this fighting nation must be maintained for the duration on the highest level in our history.

Bathrooms, kitchens and heating plants should be safeguarded with the same zeal and fidelity as our ramparts receive from our armed forces.

Why not have your Plumbing and Heating Contractor put your plumbing and heating systems in efficient order? Such a course will be both prudent and patriotic. Our Industry has pledged itself to maintain Sanitary and Heating Comfort Standards and still conserve those metals and supplies urgently needed in the All-out Military Plan. Hajoca is ready to assist your contractor in accord with all government regulations.

15th REUNION

Your correspondent has been located in Aberdeen Proving Ground, Maryland, in connection with construction activities for the past several months, Indiantown Gap having been completed. It will be noted that the address above, refers to my home address. It will be more convenient to receive mail from you fellows there than attempting to locate me in the service.

One of the keenest disappointments of recent times was to be unable to get to our 15th Reunion. At the date of this writing, I have heard nothing, but hope that the Reunion was well attended and everything went along smoothly. In looking over last month's BULLETIN, I have noticed a picture of our Class's 10th Reunion and wonder in retrospect the changes five years have brought about.

In these most difficult times, it is an effort to attempt to keep in touch with many and I particularly make the plea to have you drop a card to the above address so that through the medium of this column, information can be passed on to the many who are interested to know of your particular whereabouts.

From information received, Lt. R. N. Pursel has departed from Ft. Geo. G. Meade, Maryland, for whereabouts unknown. G. E. Furnival's latest address is 614 Airdale Road, Bryn Mawr, Pennsylvania. J. H. Rieffe, Jr.'s new address is 602 Kingston Road, Baltimore (Govans Station) Maryland.

Your correspondent regrets that this column doesn't have much meat in it, but due to times

and conditions, I have been terribly handicapped accomplishing what we used to call extra curricular activities. The days here are not long enough.

Best of luck to each and every one.

CLASS OF 1929

John M. Blackmor, Correspondent
P. O. Box 308, Summit, N. J.

Ours was not an official reunion class this year so we are not supposed to have any space in this issue. Since this is the final BULLETIN of the year, however, and since your correspondent has taken it upon himself to give all the news he can about our classmates in the armed services, he is asking Ye Editor to include '29 this time.

The June issue which carried over 400 names of Lehigh men serving our country included six from the class of 1930, only three of our fellows and only three '28 alumni. While it is likely that '30 will find more of its men serving than we, due to the age differential, nevertheless I was provoked because already in these columns this year I have specifically mentioned eight classmates: Capt. Ned Baker, Capt. Ted Benton, Henry Hayward (War Dept.), Sgt. Art McNickle, Capt. Todd Neath, Jim Schaefer, Lt. Irv Schwab and Lt. Charlie Schwitzer.

Moreover, in fairness, Baker, Neath and McNickle were three of the early birds on active duty long before Pearl Harbor. Another of these who has just come to my attention is Ralph Visco. He is the only man who has written me since I published such a request in April. Looking back in my files, I find that almost five years ago Ralph was stationed out in Nyssa, Oregon with Company 1271 of the Civilian Conservation Corps, where he was an army lieutenant. That was in January 1938. In November 1939 he was in charge of the ordnance repair shop at Fort Hamilton, N. Y. Today this military career man is probably the highest ranking officer of the Class of 1929. This Chemical did not write much about himself but did say his duties are all administrative and he is able to commute daily from his home in

Cresskill, N. J. to Governors Island where he is assistant ordnance officer at First Army Headquarters with the rank of major.

I shall take the liberty to reprint several short paragraphs from Ralph's letter:

"I'm not much on this letter writing but after reading the May BULLETIN including your column I am going to give you some dope so you won't make the same mistake as the editor and report some of us ordnance fellows dead. It's a good picture of Col. Torrey they got but instead of being dead he is very much alive here on the Island even though he is in the hospital at the moment.

"In my three years on duty I have run into a few Lehigh '29ers but changes are so fast I can't guarantee any of the following except about Benton. Ted Benton, Captain, is assistant ordnance officer, Sixth Army Corps, Providence, R. I.

"I've had some letters signed by a Capt. W. O. Heilman, Picatinny Arsenal, Dover, N. J. and I'm pretty sure it's our Bill. Also George Prokop was on duty with the Ordnance Field Service School at Raritan Arsenal some time ago but whether he is with the school at Aberdeen Proving Grounds now I don't know."

Upon receiving this tip I immediately contacted Bill Heilman and verified the fact that he is now a captain and in charge of the Procurement Division at Picatinny. His department has expanded from a personnel of 14 to 60 since 1939 and last year they bought more than \$65,500,000 worth of goods, issued 16,000 purchase orders, wrote more than 1,100 formal contracts and sent out more than 12,000 requests for quotations and bids. The above figures are not war secrets as I read them in the Picatinny News which Bill obligingly sent me in lieu of a long letter. The same news story carried an interview with Capt. Heilman in which he stated:

"Our place in the Arsenal picture is to take over the orders of requesting groups and follow

MANY OF THE OLDER CLASSES SCORNE ELABORATE OUTFITS

through until the material is in the Stores. This means that Procurement handles the details of advertising for bids, investigating the bidders, drawing up the contracts, and keeping tabs on the order until it is delivered. Then if inspection should reject the material after it has arrived, it is up to Procurement to untangle whatever confusion results and get the material wanted as soon as possible."

On Alumni Day I learned of another of our number who is joining the Army. Ernie War-

low, who has been living in Bethlehem and working for the Steel has volunteered and goes in as an officer on July 1st. So now, readers, we have a list of a dozen classmates in active service. During the summer I expect I shall hear from more.

There were not many '29 boys back for Alumni Day but I did run across John Dale Kelley, Tom Brennan, Walt Galtner, and Jack Kirkpatrick. You men should be apprised of the fact that at the annual meeting of the

THE CRESTMONT INN

EAGLES MERE, PA.

Board of Trustees, Kirk was elected assistant treasurer and assistant secretary of the University, these responsibilities in addition to his position as assistant to the president. Congratulations! Jack has just returned from the Delta Upsilon national convention at Cleveland where he had a conspicuous part by virtue of being second vice president of the national fraternity. Kirkpatrick told me some news which I pass along to you with deep regret. He has learned that Oogie Chamberlin's wife had died in Honolulu in January. Bill Palm, '27, whom I saw at the Smoker told me his brother, Mike Palm, '28, the old soccer player, is also in Hawaii with the U. S. Coast and Geodetic Survey and writes that almost everything in the islands is being rationed today.

Permit me to close my year's report with some news from Gordon New, the tennis letterman and Phi Beta, whom we had lost track of since graduation 13 years ago. I received a letter from him in December written from Port of Spain, Trinidad, B. W. I, but the letter did not say anything about his business connection. All that he wrote was that: "I've bounced around a good deal since college days but have finally settled down here in Trinidad, found the One and Only and we now have one boy and one girl and everything is rosy."

In March the Alumni Office advised me of a change of address for Gordon. You will all be interested to learn that New is with Pan American Airways in Guatemala City, Guatemala, C. A. Hasta luego!

Joe Conrath, according to Brennau, has also joined the Pan American organization. This engineer, a specialist in hydraulics and municipal water supply problems, has been sent to Florida for his first assignment, Miami Beach, I believe.

CLASS OF 1932

Captain J. F. Schwartz, Guest Correspondent
414 Grace Hall, Lehigh University

10th REUNION

Carl Schier has asked me to "Carry the Ball" for him on this issue and to report on the 10th class reunion which he wasn't able to attend. My active duty assignment to the staff of the Military Department at Lehigh since 1940 has placed me in a position to view, and participate in, the activities of the college from the other side of the fence—as a graduate and faculty member. Needless to say the assignment has been a pleasant one. And now to the reunion activities.

Only a few of us were on hand to attend the Alumni Banquet on Friday June 5th at the Hotel Bethlehem, and hear three "corking good" speeches. I am not going to report on these speeches because they will be discussed elsewhere in this issue. Following the banquet the Alumni Association staged a smoker at the Bethlehem Club. '32ers demonstrated that they had not forgotten how to imbibe the good old Bethlehem beer by remaining until the last barrel went dry. Harry Osborn, Chic Casselman, Hank Elliot, Fran Morris, Wint Miller, Stu Shimer, and Yours Truly swapped stories until the janitor literally swept us out the front door.

Saturday the Alumni Parade and Class Banquet highlighted the activities of the week-end. Ed Ross reported in the morning and had to leave to make a train for New England. At luncheon in the new Lamberton Hall dining room, Al Hoyt, Phil Myers, Bill Griesinger, Phil Narzisi, Barkley Wyckoff, John Magyar, Kuklentz, Joe Hunoval, Joe Napravnik, Chic Best, "Feet" Sinclair, Sid Land, and John Williamson joined the '32 reunionists, mentioned above, and made the representation somewhat larger than the few of us who had turned out the previous evening. I don't think I have to de-

scribe the "costume" that we wore in the parade, it having been announced in the last bulletin mailed you prior to the week-end. Mounted on skates and outfitted in shorts and pith helmets, we drew a big laugh and applause from the crowd. It was just as amusing to us for it took us some time to recover the skill of staying on skates. The rough surfaced roads of the campus which, as you know, are not exactly level, added to the difficulties in accomplishing this. Not a few of us were partially dismounted before the parade was over. We are proud to report that no one left his feet completely although some of us came mighty close to it. Sinclair's skates looked as if they had developed broken arches and had taken more of a "drubbing" than he. After the parade we removed the motive power and adjourned to the Bethlehem Club for some refreshing beer and the banquet. Russ Burk arrived just in time to make the banquet. The balance of the evening was spent in a short business meeting and much talk. You'll hear from Harry Osborn that the group made nominations for the class officers for the next five years and requested that he complete the election by mailing a list of the candidates to you for your vote.

With the banquet and business meeting over everyone refitted himself with a glass of beer and reminisced of times past since we had last met. Harry compiled a list of what each one of us is doing, and no doubt Carl will feature it in one of his future articles. There were many questions asked about those of you who couldn't return for the week-end, most of which went unanswered. A short note to Carl about your activities will help in bringing the information up to date on all of us.

In the event you chance to pass through Bethlehem, stop off and call on me in the Military Department located on the top floor of Lehigh's new Grace Hall. I'll be glad to escort you around Grace Hall and point out other new additions to the campus (if I'm still here!!!)

You Can Expect
**MAXIMUM RESULTS FROM
FLUORESCENT LIGHTING**

When You Specify
BENJAMIN FLUORESCENT UNITS

Fluorescent Lighting is the greatest advance in illumination since the invention of the incandescent lamp. Men of Industry and Commerce have been quick to recognize the manifold advantages of this cooler, more comfortable and economical Daylight lighting.

The same engineering excellence and high quality construction which have made Benjamin the leader in lighting and flood-lighting reflectors for Industrial and Commercial use are now to be had in Fluorescent Lighting Units . . . Lighting Units that assure maximum results from Fluorescent Lighting.

Descriptive Bulletin of the many Benjamin Fluorescent Lighting Units for Industrial and Commercial use may be had by addressing B. G. Kadibonoff, '98, Benjamin Electric Mfg. Co., 230 W. 17th Street, New York, N. Y., or to Dept. "Q" Des Moines, Ill.

CLASS OF 1933

Robert L. Davis, Correspondent
General Electric Co., Indianapolis, Ind.

Here are two snappy letters which we have received from two of our classmates. Enough said. I only wish that more of you in business and the armed services would write to us more often.

3013 Lee St.
Columbus, Ga.
April 19, 1942

Dear Bob:

I always read with interest your pieces in the ALUMNI BULLETIN and feel disappointed when you miss an issue. Then I ask myself what I had done to help you out and I had to admit I hadn't done a thing. So here goes for you and those others who might be interested.

Starting in November 1933, I worked for the Bethlehem Steel Co. until the 12th of January of this year when Uncle Sam tapped me on the shoulder and sent me off to the Army. (Remember Ft. Washington). I was in the Wheel and Axle Sales at Bethlehem until Sept. 1937 when I was sent to Baltimore to handle the railroads having headquarters in Maryland, Virginia, and North Carolina. This was a most interesting job and I enjoyed it and also living in the country just outside of Baltimore.

In the meantime I married Frances Holton from Bethlehem and we now have two towheaded children, Bruce age 4, and Nancy age 1.

On Jan. 12th of this year I was ordered to active duty here at Fort Benning, Ga. to attend the "Rifle and Heavy Weapons" school. It was a 13 weeks course and I am now supposed to be able to lead a Rifle or Heavy Weapons Co. into battle. But instead I got assigned to the Infantry School as an instructor in the "Attack Tactics Group."

Fran and the children spent the winter in Florida while I was in school and are now with me here in Columbus, Ga. (The old timers say hell is only two feet below the surface of the earth in this part of Georgia. That accounts for the heat). How long we stay here is anybody's guess.

All the Lehigh men taking the course with me were also kept as instructors, and that speaks pretty well for the Old Alma Mater.

Capt. Rice from Lehigh is now Col. Rice and Executive Officer of the Tactics Committee of the Infantry. He and Mrs. Rice are just as charming as ever.

Well, Bob, that is the dope as briefly as possible.

If you should turn up down here be sure to get in touch with me.

Very truly yours,
John Aufhammer.

April 28th, 1942

Dear Bob:

Here goes to you with some news from the Pittsburgh area and the boys here from 1933 along with a brief sort of Treasurer's report which I think is due our class mates.

The latest bit of news about any real change is that about "Pete" Peck who has been transferred to Washington to take care of, I understand, all of the priorities for the Anaconda Wire and Cable Company. Pete is happy about the transfer for various reasons and if anyone wants more detailed information the dope can be secured by writing Pete at 105 Pr.rose Street, Chevy Chase, Maryland.

Talking to Jim Roessle the other day, I learned that he had been married several years and now is living at 1430 Key Avenue in Dormont, Pa. Jim's title, we hear, is Assistant to the General Manager of Mesta Machine Company. Jim said to me, "Imagine me with all engineering now and an Arts course at Lehigh."

I hear from Bill Cooper—but not often enough—and he now is in New York with the Hope Natural Gas Company where he is doing a splendid job. I gather from the tone of Bill's letter that he would like to see some of our 1933'ers who might grace his office at Room 3000, Rockefeller Plaza, New York.

From Frank Snively comes word that he is now in Florence, South Carolina where he has a responsible job with the Ordnance Department of Army. Many of us may now know that Frank was for some time here in Pittsburgh with Armstrong Cork Company after which he went to Indiana to take over one of their big jobs. Then the war and Frank went to Mt. Clements, Michigan and from there to his present location.

Now, Bob, for a brief but to the point Treasurer's report. Back in the ole' days our class

started off with a balance of \$573.21—balance on hand after graduation. With the expenses that were incurred at both the 1st and 5th reunions along with various donations to the University, we now find \$276.07 in the bank. \$177.83 of which is now accumulating at 3% interest BUT WE ALSO have \$200.00 worth of twelve year government Defense Bonds for which we paid \$148.00 during the last two weeks.—That, Bob, in the event you wish to pass on the facts to our boys—many of whom are happily and gladly with the Army, Navy, or other Government forces—is the dope about the financial condition. We do not, as you may know, get any income from any source whatsoever at this time.

Seems to me that we all should begin to plan to get back to that big 1943 reunion. Already the talk among us here has started and let's hope—by God—that we'll ALL plan to GET TO BETHLEHEM.

Bob, I have not seen much in your columns about the boys who are in the Army. Why not some dope as to where they are—if you want news and you don't have it, to the enlisted boys I say, "Why not drop Bob Davis a line as to the latest dope about yourself."

Will try to send more information to you in the near future and in the meantime good luck and best regards.

Sincerely,
Burt Riviere

I know that you all appreciate hearing from these two gentlemen, and your correspondent appreciates deeply their writing for publication in your column.

CLASS OF 1937

Leonard H. Schick, pinch-hitting for
Don Barnum
Alumni Office, Bethlehem, Pa.

5th REUNION

We waited four years for our fifth reunion, and now it is over. Two short days crammed with all kinds of activity. A grand time was apparently had by all. At least there were no complaints, and that is something. For you fellows, who couldn't get back or didn't want to come back, I would like to say you missed a swell party.

Dressed in white sweaters, and crew hats, the 28 members who paraded presented a nice picture, and narrowly missed winning the parade flag. The only thing that hampered our marching was members of 1932 who tried to parade on roller skates. We had to watch our steps or several 1932'ers would have been badly crushed. Don Barnum got the idea of carrying signs, and promptly entered one of the engineering labs, and emerged with crudely painted boards saying "Here come the 4-F

boys" Funny? Maybe not, but we all enjoyed it.

After the parade, most of the gang went to "Joe's" and then later to the University Room for the banquet. A few fellows, like Jerry Levy, fell asleep, but as soon as the food was on the table they revived. The dinner was swell, Jack Gordon, now manager of the Hotel, had to produce, and he did. Sirlain steak, et al. Plus of course a barrel of beer, (which no one drank). Flip Fairbanks presided as toastmaster, and after a letter was read from our prexy Pat, Fairbanks was elected president until such time as Pat can return and resume charge.

There was no formal program but every one stood (or leaned) and gave a short biographical sketch of their lives during the last four years. Some of the yarns would make good plots for a pulp magazine. Anyway there was always something about "ducks in an oven." Never could figure that one out. (Incidentally, please forgive the rambling text, but my mind is still dwelling on the reunion). O. K.

BUFFALO • CINCINNATI

Karl Jacobi, a proud Poppa of ten weeks, was strutting all over the place, and seemed to have a marvelous time. He hinted that he has been celebrating for 10 weeks, and that he forgot where he works. I wonder. Someone else mentioned that they passed out cigars two weeks ago, but for the life of me I don't know who it was.

Jack Scanlon, was the money man in the crowd, and when the funds ran out, it was Jack who passed the hat for extra dough to pay for the beer. What a time Gordon and I had figuring out expenses on the table cloth. It was a lot of fun scribbling (particularly since the Hotel paid the laundry bill).

Hell. So much happened that I can't remember it all, and why should I write anymore, when most of the fellows who subscribe to the BULLETIN were back in Bethlehem for the big fifth.

One thing almost threw a pall on the reunion. It seems that Bob Bailey, Tom O'Brien, Clint Stone, and McGlaughlin '38 took a ride after the banquet, and had a little fuss with the tail end of a truck. O'Brien wound up in the hospital, but I understand his injuries, while painful, were not serious.

And that just about ends this stint. In closing if you couldn't make the fifth, remember the tenth, 1947. I wonder how many of us will be bald by then.

CLASS OF 1941

Donald R. Schoen, Correspondent
1 Hudson Ave., Mount Vernon, New York

FIRST YEAR REUNION

FLASH

About three hours prior to the time I wrote these notes Carl Stotz and I crossed paths at Jones Beach on Long Island. Carl is working 55 to 60 hours a week in electrical research for Sperry Gyroscope in Garden City. In addition to being busy, he is extremely interested in his work. Save for being in on a chain letter among the E.E.'s, last January, he says he's heard or seen nothing of the class of 1941.

KEEP 'EM COMING

You've been fairly generous with the mail during the last few months; keep it up. Most welcome was probably the interesting letter from Ed Kister, reporting from Box 636, Cocoli, Canal Zone: "As you know, I originally went to work for the Cities Service Oil Company. . . However, I felt I was of more service to U. S. as an engineer than as a private, so I took a job down here. I'm doing what is known as layout work, that is laying out the work in

the field for the contractor to build. . . Panama is quite a spot, as is the Canal Zone. This is government socialism, if I ever saw it."

Bill Wise dropped me a letter from New York City, where at the time he was a neighbor of Mrs. Roosevelt's in Washington Square. By the time you read this he's undoubtedly in the Air Corps, having been given a leave of absence from the Engineering Department (Bill was one of Carothers boys, no less) of the General Cable Corporation.

Lieutenant Bill Hodson wrote to say: "I've been on duty since last June with the Philadelphia Ordnance District. At present I'm stationed at a plant in Reading. It isn't as active as being in the field, but it is interesting and more along engineering lines."

IN MEMORIAM

Since the last appearance of this column, we've received very sad news about Doug Brown. He was killed in action over the Ruhr on April 5. May his heroism inspire each of us to exert every ounce of effort to bring this mess to as speedy an end as possible!

Two other members of the class have passed on since graduation: David Kemper died sometime before the close of 1941, according to a note sent me, and Dave Barnecott was killed while piloting an Army plane.

SECOND EDITION

Jack Romig wrote me early in April to try to help the column along; it's his second letter, too. Says he: "I am still on the job at the Aluminum Co. of America." Al Hess is also there. . . The Great Clam (Hess) took the fatal leap in March. Mrs. Hess is the former Leola DeWitt of Scranton, Pa.

"I had a card from Nate Folwell in the Quartermaster Corps. He was at an Air Base in Alabama at Christmas; your guess is as good as mine as to where he is now."

WEDDING BELLS

B. M. Swope of the class of '07 wrote me to say that his son Glenn ('41) had been learning to pilot a flying fortress at Hendricks Field in Florida. Glenn also announced his engagement recently to Miss Tullie Duke of San Antonio, Texas.

METROPOLIS NOTES

Here in New York I've seen several members of the class: I had dinner one evening with Harold King and Leon Plante who are studying at General Theological Seminary. Roswell Davidson is also in New York, working for Columbia University under the super-

ENGINEERS WANTED

For research and development in the Bureau of Aeronautics, Washington, D. C. Write c/o Garrett B. Linderman, '14, and explain Lehigh connection in application.

RADIO OPENINGS

The position of radio inspector in the Federal Communication Commission has been added to those jobs in the field of radio for which the U. S. Civil Service Commission is seeking qualified persons. Salaries range from \$2,000 to \$2,600 a year. The maximum age is 45 years. Applications for the written test on radio and electrical engineering must be filed with the Commission's Washington, D. C., office not later than April 21, 1942.

For assistant positions (\$2,000 a year), completion of a 4-year college course in electrical or communication engineering or physics is prescribed. Provision is made for the substitution of radio engineering experience for this requirement. To qualify for the \$2,600 positions, applicants must have had in addition at least 1 year of appropriate radio engineering or teaching experience, or 1 year of graduate study in communication engineering. All applicants must be able to transmit and receive messages in the International Morse Code.

H. H. Donaldson married Miss Eleanor J. Carlock, June 2, in the East End Christian Church, Pittsburgh, Pa.

William M. Fine, Jr., married Miss Harriet J. Hoettcher in St. Paul's Church, Peoria, Ill., May 23.

Caspar R. Musselman married Miss Virginia H. Wirth, June 13, in Packer Memorial Chapel, Lehigh University.

CLASS OF 1940

Second Lieutenant Alfred V. Bodine, Jr. married Miss Betty Jane Ritch, May 14.

Charles D. Brown, Jr. married Miss Elizabeth C. Cookman in Westminster Presbyterian Church, Elizabeth, N. J.

CLASS OF 1941

Joseph L. Conneen married Miss Jane M. Walker, May 20, in the Post Chapel, Spence Field, Moultrie, Ga.

Charles E. Clain married Miss Charlotte Seaver, June 13, in the Presbyterian Church, New York City.

Ensign Fred J. Schineller married Miss Cora L. Mullin, May 20.

Robert C. Reber married Miss Margaret Ann Pazzetti, June 20, in the rectory of St. Simon and Jude Church, Bethlehem, Pa.

Edgar C. Slack married Miss Madeline L. Angeline, June 6.

Kenneth L. Fielder married Miss Doris W. Roemer, June 13, in the Old Moravian Chapel, Bethlehem, Pa.

CLASS OF 1942

Lieutenant Alan H. Conklin married Miss Martha A. Scarborough, May 20.

John B. O'Hara married Miss Ruth B. McCabe, May 24, in the Packer Chapel, Lehigh University.

George V. Holby married Miss Esther E. Hughes, May 28.

John C. Lambert married Miss Alberta Ciser, May 20, in the First Presbyterian Church, Carlstadt, N. J.

IN MEMORIAM

J. T. Reese, '80

Jenkin T. Reese, retired mine inspector, died May 19 after a brief illness.

Mr. Reese graduated from Lehigh University in 1880. As a mining engineer Mr. Reese won a high place for himself in the anthracite industry.

Surviving are his two sons.

MOHAWK

IS A DODSON COAL

THERE is a double reason for specifying Dodson anthracite. You want coal pledged to maintain the highest standards of preparation and quality at all times. Then, too, the officers of Weston Dodson & Company are Lehigh University graduates almost to a man. Your own dealer will supply you with Dodson anthracite. Be sure to ask for it particularly when phoning your order.

JOHN LISLE, '35

J. G. White, '87

James G. White, engineer, contractor and investment banker, died June 3 at the age of 80 years. He had been in ill health for fourteen years.

Mr. White received a Bachelor of Arts degree from Pennsylvania State College in 1882, an A.M. in 1884 from the same institution and in 1885 a Ph.D. from Cornell and in 1887 an A.B. from Lehigh University.

Surviving are his widow and son.

Harry Wilbur, '87

Harry Wilbur died May 27 in Bethlehem, Pa.

C. M. Denise, '98

Charles M. Denise, retired Bethlehem Steel Company executive, died June 2. He was 69 years of age.

In 1895 Mr. Denise graduated from Rutgers University and in 1898 he received a C.E. degree from Lehigh University.

In 1903 he became affiliated with McClintic-Marshall Company, Pittsburgh, and the following year was placed in charge of its Chicago office, where he remained for 15 years until he was transferred to Pittsburgh to supervise the entire sales department. Beginning in 1936 the business of the subsidiary was conducted in the name of the parent company and Mr. Denise became general manager of sales, fabricated steel construction, Bethlehem Steel Company. Because of ill health, Mr. Denise resigned on October 9, 1941.

He is survived by his widow, Mrs. Lucy M. Crandall Denise, and two sons, both graduates of Lehigh University.

L. E. Edgar, '98

News of the death of Mr. Linden E. Edgar has just been received. Mr. Edgar died April 4, 1942.

R. S. Shriver, '99

Robert S. Shriver, prominent Catholic layman and former president of St. Paul's Guild, died June 12 in St. Clare's Hospital after a long illness.

Mr. Shriver graduated from Lehigh University in 1899. He was president of the Converts League of America, which later changed its name to St. Paul's Guild. He was also president of C. W. Young & Company.

He is survived by his widow and two sons.

J. C. Sellers, '02

James C. Sellers died May 3 of a heart attack. He was 62 years of age.

Receiving his education at Lehigh University, Mr. Sellers entered the employ of the Aluminum Company of America, a position he held for 24 years.

He is survived by his wife, and six children.

C. E. Butz, '05

Charles S. Butz died May 30 at Orelan, Philadelphia, Pa.

Mr. Butz graduated from Lehigh University in 1905 with the degree of E.E. At the time of his death he was employed as an electrical engineer in the Philadelphia Navy Yard.

He is survived by his wife and daughter.

C. B. Bressler, '08

After an illness of several months, Mr. Calder Bressler died May 16.

Mr. Bressler was born in Lykens, Pa. and was graduated from State Teachers College in West Chester, Pa. He later attended Lehigh University and was a member of the Alpha Tau Omega fraternity.

Surviving are his widow, Mrs. Marion Tupper Bressler and two sons.

D. K. Evans, '13

Daniel K. Evans, manager of the Chazy Marble Company for sixteen years, died April 2, 1942. He was 50 years of age.

Mr. Evans graduated from Lehigh University with an M.E. degree in 1913. In 1914 he accepted a position with the Chateaugay Ore and Iron Company at Lyon Mountain where he worked until July 1925, when he transferred to the Chazy Marble Lime Company. He held the position as manager until his death.

He was a member of the Plattsburg Rotary Club, Royal Arch Masons and Mt. Hermon Lodge of Ellenburg, and was also a member of the Delta Upsilon fraternity.

He is survived by his widow and a daughter.

R. B. Dayton, '14

Lieutenant Colonel Roscoe B. Dayton, member of the Officers' Reserve Corps, died May 24 at McKinley Hospital after suffering a heart attack on May 12. He was 53 years old.

Colonel Dayton was a professional engineer for the Shelt Company of Elmira, New York, and for the past six years had been treasurer of the Engineers' Club of Trenton. He was also a member of the Wetzel Lodge, No. 39, F. and A. M., of New Martinsville, W. Va., The Tall Cedars of Lebanon, Scottish Rite, and Trenton Post, American Legion.

Surviving are his wife, Mrs. Lela H. Dayton, and two children.

W. W. Gilmore, '17

Commander Walter W. Gilmore has been reported killed aboard the U. S. S. Lexington during the Coral Sea battle. From previous reports Commander Gilmore was said to have been lost on the sunken ship, but a confirmation from the Navy Department reports that he was killed by a bomb blast.

In 1917 Commander Gilmore received his A.B. degree from Lehigh University and in 1924 an M.B.A. degree from Harvard University.

Commander Gilmore was the Lexington's supply officer and was co-ordinating officer between all Pacific fleet carriers.

T. F. Lynch, '34

We have just been informed of the death of Thomas F. Lynch who died June 15, 1939.
